## Russian issues **US magazine**

Boris Berezovsky, the controversial Russian businessman and deputy head of the security council, yesterday launched a bid to clear his name in the west. Employing George Carman QC, Britain's most feared libel advocate, and Peter Carter-Ruck and Partners, the prominent UK libel law firm, Mr Berezovsky issued writs for libel in London against Forbes magazine. He alleges Forbes defamed him by claiming he had links with the Russian mafia and had been connected with the murder of a Russian TV presenter. Though Forbes is an American magazine, the action is being pursued in Britain because US libel law makes it almost impossible for a public figure to bring a successful action.

Kremiin aims rhetoric at Nato chief:

Moscow stepped up its anti-Nato rhetoric, accusing the western alliance of trying to subvert Russian security interests in its own backyard. Nato secretary-general Javier Solana, left, target of the Kremlin's verbal attack, said Russia had "misconceptions and stereotypes" about the alli-ance. He assured Moscow it would not be left out of a new European security system. Mr Solana is visiting to Moldova, Armenia, Azerbaijan , and Georgia, where he is pictured with President Eduard Shevardnadze, a former Soviet foreign minister. Page 3

French deficit over target: France revealed that last year's budget deficit was about 2.6 per cent over target but stressed its determination to qualify for entry to Europe's proposed single currency. Page 12; Inward investment, Page 2

Swiss bend to pressure: The Swiss government gave in to mounting pressure, announcing it would within weeks set up a compensation fund for destitute Holocaust victims though not whether it would contribute money. The decision was spurred by a \$71m contribution from the country's three biggest banks.

Listing for metals unit: Sweden's Trelleborg ) 16 to fist its P mining and metals unit in Toronto later this year. The decision helped lift Trelleborg shares SKr2.50 to SKr119.50. Page 13

Fighter decision: Chancellor Helmut Kohl's cabinet will decide before Easter whether to make a firm order for the Eurofighter 2000 combat aircraft. Bonn's partners in the project -Britain, Italy and Spain - went a firm German order so production of the fighter can begin.

Soldier killed in N Ireland: A British solider was shot dead and a civilian injured in the Northern Ireland village of Bessbrook, home of a big British army base. It was the first British army casualty in the province since Irish Republican Army terrorists fighting British rule bombed Britain's Northern Ireland army headquarters in October, killing one man.

Piedge to Ecuador: Fabián Alarcón Ecuador's third president in five days took office promising to restore stability to the country after a week of strikes, marches and political turmoil Page 4; Editorial Comment, Page 11: European stocks, Page 32

Japan Paper Industry and Jujo Paper Board will merge in October to create Japan's second largest paper board manufacturer with a combined 12 per cent share of the domestic paperboard market. Page 13

Rushqie bounty raised: Iran's 15th Khordad Foundation charity has raised the reward for the killing of British author Salman Rushdie to \$2.5m. It first offered \$2m in 1989 after Iran's late leader Ayatollah Khomeini issued a religious edict imposing the death sentence on Rushdie for alleged blasphemy against Islam in his novel The Satanic Verses.

## Kohl calls for pay freeze to assist **jobless**

By Raiph Atkins in Borm

Chancellor Helmut Kohl called on Germans yesterday to accept real pay freezes, or modest increases, for the next few years as part of his battle to cut high unemploy-

ment. His appeal came as impor tant allies in the ruling Bonn coalition gave public support to Mr Kohl – who has been chancellor for more than 14 years - running for the post in next year's federal elec-

The backing from Mr Theo Waigel, finance minister and leader of the Bavarian Christian Social Union, and Mr Wolfgang Gerhardt, chairman of the Free Democratic party, appeared designed to quell debate within the coalition about possible successors, prompted in part by nervousness over Germany's increasing economic difficulties.

In an interview with the mass-circulation Bild newspaper. Mr Kohl said it was "absolutely reasonable" for Germans with jobs to accept for "a few years" small or zero rises in real pay "to improve the employment prospects of those who are jobless".

However, his appeal was rejected by union leaders who pointed out that belowinflation pay increases were already widespread.

Mr Kohl said halving unem ployment by 2000 remained his goal. But he acknowledged the target was "ambitious and

will be difficult to achieve". He rejected suggestions that tackling unemployment, which reached an unadjusted total of 4.66m last month, was incompatible with budget cuts needed to meet the Maastricht criteria on economic and mon-

etary union. Separately, Mr Waigel used a speech in Passau. Bavaria. to outline steps under which radical tax cuts planned by Bonn from 1999 as part of Germany's economic restructuring could be introduced a year earlier, provided backing

## inadequate and not in the When Hilton Hotels made its Minister quits over S Korean loan scandal

By John Burton in Secul

South Korea's home affairs minister resigned yesterday over the Hanbo Steel loan scandal, dealing a further blow to President Kim Young-sam's beleaguered administration.

It is the first time the scandal, which has led to the arrests of several leading bankers and members of parliament, has reached into the government itself.

The resignation of Mr Kim Woo-suk came as the prime rest of the cabinet might follow suit in public atonement over allegations that senior nt officia banks to lend nearly \$6bn to Hanbo, which went bankrupt last month. Public attention was dis-

tracted from the scandal yesterday when a senior advisor to North Korean leader Kim Jong-il sought asylum in South Korea. Mr Hwang Jang-yop is the highest ranking official yet to do so and government officials tried to make the most of the propaganda coup by claiming his defection meant North Korea was close to collapse.

In an attempt to restore public confidence in the South Korean government, aides to President Kim have indicated an extensive cabinet reshuffle. The home minister was questioned by prosecutors

about allegations that he accepted payments from Hanbo when construction and transport minister and head of the state's land development agency. The two bodies were crucial in approving the building of a large steel mill by Hanbo, which collapsed under heavy debts from the project. Meanwhile, the chairman of

the parliamentary finance and economy committee became the third senior ruling party MP to be implicated in the scandal. Two opposition MPs minister suggested he and the are also being investigated for allegedly receiving bribes to silence their criticism of the huge bank loans to Hanbo.

port for the government, South Korea's religious leaders said responsibility for political discontent from the Hanbo scandal "lies with the government and ruling party". They hinted Mr Kim should step down as head of the New Korea party to assume an official caretaker role as he nears the end of his single presidential term.

Opposition parties have accused prosecutors of conducting a "whitewash" to hide the alleged "mastermind" role Hyun-chul, in the scandal. "President Kim should

of the president's son, Mr Kim Defector Hwang Jang-you (above) was among the 25 most important officials in Pyongyang, and known as one of North Korea's top ideo-North Korean defector, Page 6 logues. No reason was given Lex, Page 12 for his defection.

## Return of fur to catwalk sends auction price higher

By Bernard Simon in Toronto

sharply at auctions in North America, driven by booming despite animal demand from Russian and Chinese designers in the wake of rights protests this year's European fashion

Fashion designers caused a stir at the Paris and Milan col-(+62.73) (Feb) .\$344.9 (341.3) use of real fur. One menswear show in Milan included mink (+17.24) | Loador: close \$340.75 (338.65) printed to look like leopard. At auctions in Seattle this

week, prices for beavers, foxes, raccoons and other fur species were between 15 per cent and 20 per cent higher than last Demand for mink, which

makes up about half the fur last year's surge. The sales are organised by the Fur Harvesters Auction, a trappers' co-operative based in North Bay, Ontario that specialises in wild species such as beaver, otter and raccoon, and the Seattle Fur Exchange, which represents mink ranchers.

Wild fur prices have risen lead demand

Mr Herman Jansen, president of Toronto-based North lections last month with their keting, estimated that fur prices had roughly doubled in the past five years. A highquality mink coat now sells in North America for between US\$10,000 and US\$12,000.

In spite of continuing protests by animal rights groups, especially in Europe, Mr Jansen said sales increases in the US "are telling us that we're back in fashion, especially in market, has levelled off after the better end of the product". Animal rights protests in North America have been countered by increasingly vocal trappers' groups seeking to persuade consumers that for is a "renewable" resource and that their livelihood is

Russia and China dent of Birger Christensen, a North American fur retail chain with 55 outlets, said 1996 sales grew in the "high double

Mr Jansen said the main impetus for the rebound came from Russia and China. He estimated that 70 per cent of the 2m raccoon pelts harvested American Fur Producers Mar- in North America each year made their way into garments and hats for Russians. A thriving fur-manufacturing and brokerage industry geared to the Russian market has taken hold in Greece.

China has become a sizeable importer of fox and raccoon pelts, used mainly for trims and linings.

Mr Bernie Grogan, co-publisher of Fur World, a New York trade journal, said that many Chinese "can afford a cloth coat with a bit of fur on the collar or the hood".

Fur's image in Europe continues to be tarnished by a protracted trade dispute between the European Union and fur-producing countries threatened by the protesters. over the use of leghold traps. Mr Chris Spyropoulos, presi-

EUROPEAN NEWS DIGEST

## Lisbon acts to free telecoms

The European Commission yesterday agreed to a Portuguese government proposal to bring forward the complete liberalisation of the country's telecommunications market to 2000, two years after most other EU countries, but three years before it had

originally agreed. Portugal had been given until 2003 to liberalise by the EU, but the government decided to anticipate expected action by the Commission to shorten the transition by proposing a deadline of 2000.

The Commission did not agree to a request to delay ending the monopoly of state-controlled Portugal Telecom over telecommunications networks. It ruled that competitors be allowed to operate some services over their own networks by July 1 and that mobile telephone operators be permitted to use "alternative infrastructure"

### EU to probe French aid

The European Commission is to investigate FFr2.5bn (\$440m) of state aid paid to Société Française de Production (SFP), a French television production company on the verge of bankruptcy.

The money is intended to support a restructuring plan, related to an offer by Images Telévision International et Général d'Images to take over the business. The Commission has approved emergency aid of FFr350m to meet SFP's immediate cash flow requirements. The probe could last up to three months and will look at whether the restructuring plan will make the company viable. Brussels is also examining state restructuring aid given to Keller, and Keller Meccanica, Italian rolling stock manufacturers. The EU has doubts about two soft loans totalling L40,339m (\$24.7m) and state guarantees covering Emma Tucker, Brussels 50 per cent of the loans.

### Brussels boosts health watch

The European Commission is to set up a "super committee" of commissioners to oversee human health issues, in the wake of the "mad cow" crisis. The move is part of an extensive reorganisation of animal and human health functions announced by the Brussels executive vesterday.

Although the Commission indicated last month its intention to make the changes, the formal announcement yesterday was seen as an effort to avoid a clash with the European parliament. Parliament will vote in Strasbourg next Wednesday on the highly critical report by its special inquiry committee on the handling of last year's beef crisis, and threatened a censure motion against the Commission unless it revamped its policies.

The shake-up aims to ensure proper separation between the functions of scientific consultation, preparation of legislation and monitoring of its implementations, and between staff dealing with the agricultural market and consumer policy.

Responsibility for human health issues, spread across several Commission departments including Mr Franz Fischler's agriculture directorate, will pass under sole control of Ms Emma Bonino, commissioner for fisheries, consumer policy and humanitarian affairs. A committee to co-ordinate health issues, including Ms Bonino and Mr Fischler, chaired by Mr Jacques Santer, Commission president, will also be set up within the decision-making "college" of 20 commissioners. Neil Buckley, Brussels

### France bans modified maize

France has banned cultivation of genetically modified maize, despite a recent decision to permit sales provided it was labelled as such. The government recently lifted a ban on 30,000 tonnes of genetically altered American maize which had been held up for a month in the western French ports of Montoir and Lorient.

Consumer groups have campaigned against the modified maize since the EU approved the product in December. On February 7, Austria and Luxembourg banned imports of the maize, which it is feared could

## Swiss may start pay-outs soon

The Swiss government could begin channelling assistance to survivors of Nazi persecution within a matter of weeks. Mr Flavio Cotti, Switzerland's foreign minister, yesterday announced a two-step procedure. The first was the setting up of a government-administered special fund, backed by the private sector, to support humanitarian projects, such as aiding survivors of Nazi persecution regardless of religion, race or origin. The Swiss government will not contribute to this fund, but plans to set up and finance before the summer a separate foundation with broader

Mr Cotti reiterated the Swiss government's position that a decision on his government's financial contribution will be made only after the publication of "comprehensively confirmed facts". The Swiss government-backed historical commission expects to make its initial reports on the gold transactions of the Swiss National Bank and Switzerland's wartime refugee policy before the summer and this could clear the way for the government's contribution. Mr Cotti said any decision had to have broad popular support and this could take William Hall, Zurich

## Poland may speed sell-offs

Poland will need to speed up privatisation in order to meet the cost of the shift to a fund-based pension system, the top government official for the programme said yesterday. Mr Jerzy Hausner said the cost of replacing the pay-as-you go system in 18 months time will be equivalent to between 1 and 1.5 per cent of GDP a year. According to Mr Michal Rutkowski, one of the architects of the reform, the change should not see the country's budget deficit of around 2.7 per cent of GDP rise. However, the government will have to tighten pension payments and double the annual pace of disposals worth around \$1bn to raise the necessary revenue.

Under the reform plan the government will issue bonds, available both to foreign and local investors, which would entitle them to purchase stock at a discount in state sector companies. The reform also envisages the establishment of privately owned investment funds which would manage a part of the present contribution employers make to the pay-as-you-go scheme. The contribution currently stands at 45 per cent of gross Chris Bobinski, Warsau

## Police block centre of Tirana

÷ ~

14.35

-1.---

Riot police blocked the centre of Tirana yesterday to prevent Albania's opposition from staging new protests against the government for its handling of the collapse of pyramid investment schemes in which many Albanians had their savings. Two truck loads of police descended on the headquarters of the Forum for Democracy opposition alliance and prevented prominent politicians, including Mr Rexhep Mejdani, the Socialist party chief, from leaving the building. Mr Aleksander Meksi, the prime minister, has vowed to crack down on a wave of protests, which he says are organised by left-wing extremists.

In Vlore, about 5,000 people massed peacefully in the centre of the town. The protests in the port have been peaceful since Monday though the government has threatened to impose a state of emergency. Other protests had taken place in four towns near the

## Russia turns mind to life after Yeltsin

Yeltsin: no one knows how long he can survive

Chrystia Freeland on a debate about changing the constitution

tsars and communist L commissars, "konstitutsia", the Russian term for constitution, has always

been a word to conjure with. In an attempt in 1825 to force constitutional limits on sia" was the impassioned rallying cry on the lips of protesters in St Petersburg.

sia" was a princess. "Konstitutsia" is again in political fashion. While there is little danger of confusing the current female occupants of the Kremlin with princesses, the debate is very much focused on one man - President Boris Yelt-

The past few days have brought increasingly ominous portents about the state of the Russian leader's health. Yesterday, Mr Renat Akchurin, a top Kremlin doctor noted for his glowing reports on Mr Yeltsin's condition, cautioned that it would be 10 or 15 days before Mr Yeltsin made a full recovery from the pneumonia he contracted last month. He

described the president as somewhat weak". The previous day, Mr Sergei Yastrzhembsky, the president's spokesman, said Mr Yeltsin's "rehabilitation goes rather slowly" and "we should not expect a speedy

return to the Kremlin".

It is these bleak soundings about Mr Yeltsin's health that have focused the minds in the Kremlin on the constitution. The problem, from the standpoint of the ruling establishment, is that as Mr Yeltsin's illness drags on. the strong-arm constitution which once seemed so useful to the current regime is appearing more and more threatening.

For a start, in the event of the death or incapacity of the president, the existing constitution calls for new elections in three months.

If opinion polls are to be trusted, the front-runner in a snap presidential election would be Mr Alexander Lebed, the former security chief who has publicly rowed with most of Mr Yeltsin's current entourage. Moreover, under the current constitution, a victory by an outsider such as Mr Lebed would, in the view of the insiders, be doubly undesirable because of the vast powers the constitution would grant him.

"These discussions of conrevolt against Yeltsin," said Mr Andrei Piontkovsky. director of Moscow's Centre for Strategic Studies. Instead, they represent the fear of his successor, who, in today's circumstances, would most likely be Lebed."

n the land of autocratic begun to broach the once sacrosanct issue of constitutional change. The first inkling came from Mr Yegor Stroyev, the powerful chairman of the upper house of parliament, who last month said that the constitution the monarchy, "konstitut- was "not an icon" and might need to be revised.

His comment was taken up by parliamentarians in The power of their demand, the lower house and promiwas somewhat muted how nent Yeltsin aides, including ever, when it became clear Mr Boris Berezovsky, the appointed last year to the security council.

### The presidency is strong; the president weak

approval from Mr Yeltsin. After a recent meeting with the head of the constitutional court, the president issued a statement calling for constitutional "evolution". He said he would spell out his plan in a state of the nation address to the upper house of parliament expec ted next month. However, Mr Yeltsin's spokesman yesterday appeared to hedge that statement, rejecting a call for a constitutional assembly and saying the president thought the cur-

rent constitution "viable". Mr Piontkovsky believes that the Kremlin is mulling over at least two main versions of constitutional change. One proposal would be to amend the constitution so that the three-month caretakership by the prime minister in the event of the president's death or incapacity would be lengthened to the end of the elected president's regular term, along the lines

of the American system. Another, more radical

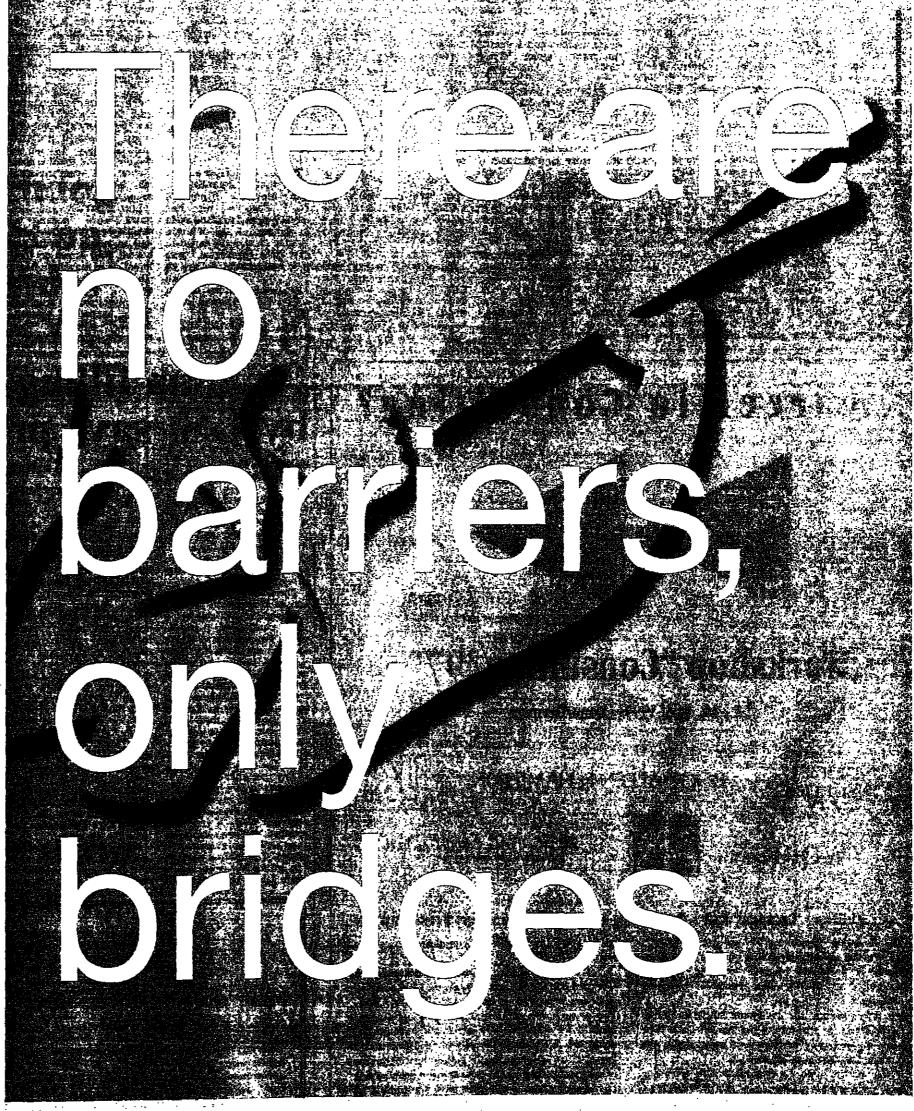

scheme, would be to alter

the process of selecting the president, shifting from a direct, national election, to voting by a federal assembly, composed, perhaps, of the two chambers of parliament. Some liberal politicians not involved in jockeying for the presidency are hoping to use the interest in constitutional amendments to by the presidency with a greater balance between

executive, legislature and

judiciary.

"The main issue is actually not the president's health, it is that we have a stitutional change are not a presidency which is structurally dangerous for Russia," argued Mr Grigory Yavlinsky, leader of the democratic opposition Yabloko party. "What the Duma [the lower house of parliament] must do now is create a constitution such that when the president has a headache. the entire country does not

## Pressure grows to water down pollution curbs

By Bruce Clark in Washington

The US administration came under congressional pressure yesterday to scale down its plans for much tougher air pollution controls as the gloves came off in an emotional fight between environmentalists and industry.

Senator John Chafee, the environment committee chairman, who has hitherto been a moderate supporter of green causes, said full implementation of the administration's plans could prove unworkable and discredit the 1990 Clean Air Act, which has underpinned the drive against pollution.

But Ms Carol Browner, the lirector of the Environmental Protection Agency (EPA), has insisted that the health of millions of people will be affected by her plan to enforce tighter limits on ozone and particulate matter

The EPA is required to announce the new standards by the summer under the terms of a court order obtained by the American

Lung Association. Ms Browner told a Senate nearing yesterday that the EPA's proposals for a new ozone standard - cutting the permitted level to 0.08 parts per million measured over eight hours from 0.12 measured over one hour - would double to 100m the number of people adequately protected from that pollutant.

At least 13m beneficiaries of improved standards would be children, who were more vulnerable than adults because they inhaled more air in relation to their body weight. Ms Browner said. "The law requires us to

provide a margin of safety," she said. "There is no more appropriate application of that requirement than to ensure that our children, simply by playing outdoors, are not doing irreversible damage to their health." In a highly charged

debate, opponents of tighter

standards have suggested that homely American pastimes such as mowing the lawn and barbecues could be outlawed as local authorities look for ways to meet virtu-

ally impossible standards. The EPA says that the new standards are justified by the latest research on public health, which is the only criterion that the agency is mandated to consider, and the change would also have economic benefits

that far outweigh the cost. Lobby groups for the oil, mining, steel and other manufacturing sectors bave made a two-pronged reply: in the case of ozone, the health benefits are clearly outweighed by the cost - and on soot, whose apparent health effects are much worse, the scientific research is inconclusive

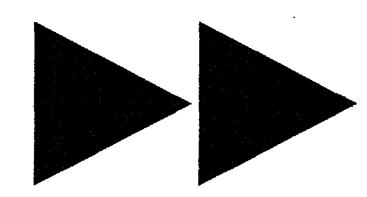

For soot, a cost benefit analysis by the EPA agency has valued the improvement in public health at up to \$120hn taking into account the avoidance of premature deaths - calculated at \$5m each - and chronic bronchi-

But Mr Tom Lareau, a senior economist with the American Petroleum Institute, argues that even if the EPA is right about the effects of soot, the benefit from restrictions is more like \$20bn - given that most deaths from respiratory disease occur among elderly people whose life expectancy

Mr Lareau said that eyen on the EPA's own assump: tions, the cost of enforcing tighter soot standards was likely to be between \$20bn and \$30bn, rather than the \$6bn suggested by the EPA's calculations are flawed because it underestimates the number of areas that fail to attain the proposed standards. On the other side, environ-

mentalists have suggested that accepting any kind of cost benefit analysis sets a

## A career in Consulting?

## Workshop "Consulting '97"

14.-16. April 1997 - Bonn/Germany

ANDERSEN CONSULTING

## Panama filling gap left US to let by US, says president

By Stephen Fidler and Ken Warn in London

troops from Panama by the end of 1999 will bring in new investment that will more than make up for the loss of income, according to President Ernesto Pérez Balla-

The US and Panama agreed in November that no US troops - save possibly a small contingent in a proposed Panama-based multinational anti-narcotics force would remain after the canal is handed over to the Panamanian government.

Mr Pérez Balladares said in an interview in London that the more than 6,000 troops currently stationed in the country would be gradually reduced until the handover. The US was not willing

to pay rent after 1999. Efforts to find investors to exploit the areas being vacated were succeeding, the president said. "I feel very satisfied and very much at ease with our substitution efforts. The income that we are going to generate is much larger that we would the past two years but said: UK and GTE of the US.

US Defence Department and better in '98." tary presence contributed some \$366m a year to the economy, about 5 per cent of gross domestic product. Mr Nicolas Ardito Bar-

letta, the former president

who heads the Interoceanic Regional Authority, the agency charged with developing the so-called "reverted areas", said close to \$700m of investment commitments had been lined up, and there were good prospects for more. Tourism groups accounted for more than \$300m of development in the rule, trying to stamp out the next four years; investment for the commercial areas

totalled \$75m. Mr Pérez Balladares said the US was considering his proposal for a multilateral anti-narcotics base for surveillance of drug trafficking and intelligence gathering. Other countries in the region were free also to join

the force, he said. He admitted economic growth had been relatively low at about 2 per cent in fied: Cable & Wireless of the

cent-plus growth for 1997

be in place by September. Panama's banking sector has been criticised for being out of date and lacking transparency, so encouraging money laundering. New legislation was also likely to include a provision under which banks could be forced for the first time to throw open accounts where suspicious transactions had taken place.

He said that the government had agreed with the country's lawyers to introduce a "know your client" practice of lawyers standing as nominee directors and chairmen of companies of which they knew almost nothing. A change in the law would be considered if the agreement did not resolve the problem.

 Panama was likely to hand over 49 per cent of its telephone monopoly and its operations in April or May, said Mr Pérez Balladares. Two bidders had pre-quali-

## EU delays clash on US anti-Cuba law US 'on board' court cases against foreign companies "trafficking" in confiscated Cuban assets, and of the Diameter law tives of foreign companies to deny entry visas to executive of foreign companies telecoms deal

By Frances Williams in Geneva

Senior trade diplomats yesterday expressed optimism that a pact to liberalise the \$600bn global telecommunications market will be successfully concluded by Saturday's deadline. Mr Karl Falkenberg, the

EU's chief telecoms negotiator, said he was "relatively confident" of a successful outcome. Though the European Union, like the US, was still looking for further improvements in the marketopening offers of other countries, he believed the package already on the table constituted the basis of a deal. Mr Falkenberg said he detected a different mood among US negotiators this time compared with last April, when the US derailed a global agreement on the grounds that other coun-

tered opening of its own market. Since then about 10 countries have come forward with new offers and about 20 have made improvements. In all, 57 governments have submitted offers in the current round of talks, representing over 90 per cent of total world telecoms revenues. Others are expected to

"I think the US will be on board at the end of the week," Mr Palkenberg said.

put forward offers by tomor-

similar view yesterday. "I believe we're very close to a deal - I'm more and more optimistic," said one senior negotiator.

The negotiator said Canada had no leeway to relax its 46.7 per cent foreign ownership limit for domestic telecoms companies, the focus of strong criticism by the US. However, it was considering improving its offer on satellite services.

Mr Jeffrey Lang, deputy US trade representative, said yesterday in a statement that the US was working hard to bring the negotiation to a successful conclusion, but "we still need to see improvements to the offers on the table". The EU yesterday pres

ented a revised offer that makes clear its commitment to liberalising all types of basic telecommunications, whether the signals are transmitting sound, data or images. However, broadcasting is specifically excluded.

Most other problems also appear to have been settled, including the treatment of satellite services and allocation of frequencies.

However, one important issue is unresolved - treatment of future commercial subsidiaries of the intergovernmental satellite organisations - Intelsat and Inmarsat. The US is still considering whether to exclude these subsidiaries from its telecoms offer because they have an unfair Canadian officials took a competitive advantage.

## Senator puts up obstacles over fast-track procedure on pacts

By Nancy Dunne in Washington

US Senator Ernest Hollings, an opponent of free trade agreements, is trying to attach conditions to the nomination of Ms Charlene Barshefsky as US trade representative which would require the president to forcing President Bill Clin-bring any trade deals negoti-ton to call a special Congresfor approval.

an obstacle to talks on global trade accords on telecommunications and information technology (IT), both nearing conclusion in the World Trade Organisation. The administration says it has authority under old legislation to negotiate both deals without returning them to Congress. But Congressional action could produce demands for changes in

a delicately balanced trade choice for trade representa- investment, but this can be pact, and the entire pack- tive so the senator could be ages could unravel.

The senator could also filibuster Ms Barshefsky's nomination unless 60 senators vote to bring it to a vote. In 1994 Senator Hollings was able to delay approval of the World Trade Organisation, ated in Geneva to Congress sional session in December.

Senator John McCain. If successful, this could be chairman of the Senate commerce committee and Senator John Breaux, a Democrat, say they think there is only a slim chance of the Hollings proposal passing. The senator's manoeu-

vring will provide an early test of sentiment in Congress and of whether the bipartisan approach in favour of trade liberalisation

Ms Barshefsky is a popular

defeated. However, Senator Trent Lott, the majority leader, has been delaying the nomination.

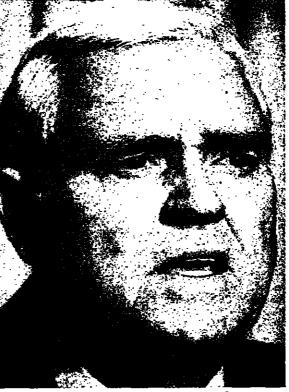

It has been held up for months because of a rule that US trade representatives cannot have had a foreign government as a client. As a trade lawyer, Ms Barshelsky provided advice to the Canadian government. Negotiations with the Senate finance committee resulted sky, leaving the nomination on course for approval. Senato amend the waiver.

Senator Hollings may find support among those concerned about the US opening its multibillion dollar telecoms market to foreign investment. US law now limits the level of foreign

munications Commission. There is also concern

about the proposed Information Technology Agreement. Several senators are seeking the exclusion of capacitors, used in highly sensitive military technology. The EU has demanded their inclusion. The US constitution gives

Congress primacy over trade. For this reason administrations have Congressional authority to negotiate trade deals which cannot be amended. This so-called "fast-track" authority has expired and the administration is preparing for a major battle to renew it. However, the administration contends that the telecommunications, information technology, and financial services deals are covered by the previous negotiating authority.

Senator Hollings: congressional manoeuvre could undermine global telecoms and IT pacts

## pigmeat row goes to WTO

By Michiyo Nakamoto in Tokyo

The European Union has pigmeat imports. The two sides will hold bilateral negotiations next week on emergency safeguard measures Tokyo has taken to restrict imports of pigmeat

from the EU. The EU says the Japanese measures have caused market disruption, effectively pricing European pigmeat out of the Japanese market for most of the year. Canada is joining the EU's request for WTO consultations.

Company of Section

CONTRICTS & TEND

The measures were introduced between November 1, 1995 and March 31 last year and were reimposed on July 1 for nine months in order to deal with a surge in imports, according to Japan's ministry of agriculture. The measures are allowed under Uruguay Round world trade rules when imports exceed the average of the past three years by more than 19 per cent. As a result of the increase in pork imports, tariffs were raised from 4.8 per cent to 6.4 per cent.

Japan imports about onethird of its pigmeat, with Denmark, the EU's largest exporter, accounting for nearly a third of imports. As a result of the measures, Denmark's share of the market has fallen from 26.5 per cent to 19.2 per cent, the EU notes. The EU claims that the way in which the measures were introduced discriminates against European exporters.

Specifically, the restrictions are aimed at frozen meat rather than fresh products, according to the EU. Since European companies are too distant to export anything but frozen meat, they are effectively shut out of the Japanese market while the measures are in place. As a result, the Japanese

measures contravene the Uruguay Round agreement, which stipulates that safeguard measures must be implemented in a resonable manner and must avoid discrimination.

By keeping safeguard measures in place during the first three months of 1996, the Japanese authorities triggered a rush of imports from European producers. which in turn triggered the safeguard measures again, the EU complains.

Pigmeat imports from the EU surged when the measures were lifted in April 1996 and plunged again when the measures were restored in July.

## EU-Japan | UK watchdog warns US on telecom rules

The UK's telecoms policy is equal to, if not better than, tion to regulatory problems complained to the World any in the world, Mr Don solved in the UK, which the Trade Organisation over Cruickshank, Britain's tele. US has to tackle. These what it says are unfair practice of communications watchdog, included charges levied by tices by Japan relating to said yesterday in a contro- local operators for the use of versial defence of UK telecoms policy to an American audience. Mr Cruickshank's first big

speech to a US audience was designed to send a warning to US authorities that their regulatory methods were neither necessarily relevant to the UK, nor the most appropriate for markets outside the US. The UK regime is under attack from US and other foreign operators who want easier access to the UK market, and from UK-based companies finding it hard to break British Telecommuni-

cations' market domination. US operators led by AT&T are arguing that the planned \$20bn (£12.5bn) merger between British Telecommunications and MCI of the US should be denied US approval until the UK changes its rules.

His remarks have added resonance, coming in the same week the World Trade Organisation hopes to conclude a global pact on liberalising telecoms markets. US attitudes will be critical to the success of the talks.

Mr Cruickshank pointed out US curbs which had no relevance in the UK, in additheir networks.

"He endorsed the UK philosophy of encouraging market entrants to build their own networks to reach customers in competition with BT: "I want to emphasise I regard provision of competing access networks as vitally important. Unless there is network competition in the local loop (the final connnection between customer and exchange) regulation will always be necessary to set the terms of

Companies such as AT&T which have not built their own networks complain their customers are forced to dial a three digit prefix before being able to place calls. He accepted US companies found this restriction difficult to understand. In a truly competitive mar-

## Sumitomo plans Internet trade

Sumitome Corporation, the in Japan, Hong Kong, Thaileading Japanese trading house, is to set up what it believes will be Asia's first Internet-based electronic trading system in a joint venture with Singapore Technologies, the Singapore government owned industrial group.

The system will match buyers and sellers via the Internet, arrange for delivery and clear payments on behalf of trading companies across the region. It will be set up by the end of April and start operating in March next year, handling exports of used cars from Japan to

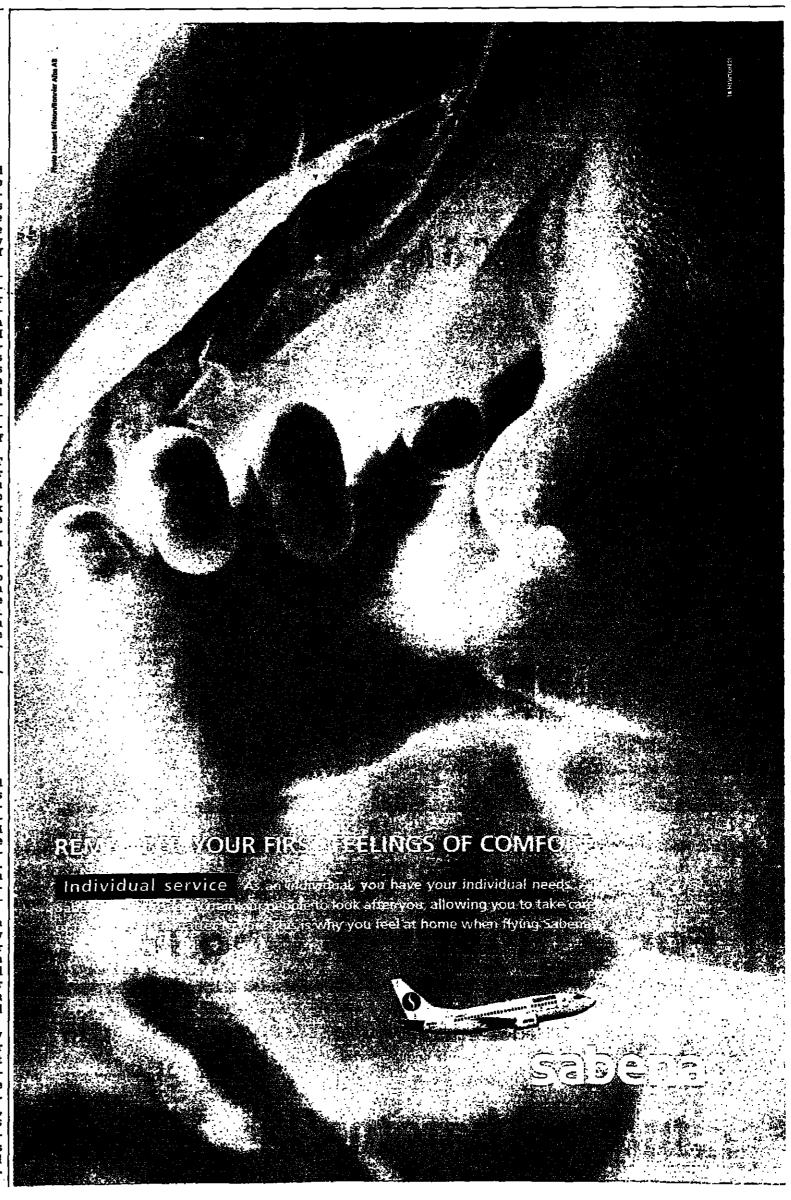

the rest of Asia. Sumitomo said the group planned extending the system to handle other goods, such as electronic components, construction machinery, oil and petrochemicals, and was seeking similar partnerships with US and

European companies. named Asia Business Ven-

By William Dawidns in Tokyo ture Holding, would be based in Singapore, with branches land, Malaysia and Indonesia. Japanese customs and financial regulations were too onerous for such a venture to operate in Tokyo. "We found Singapore was a much freer business environment for this kind of operation." said Sumitomo.

Customers would send an Internet message to the new service, requesting sale or purchase of a traded item and indicating volume and price. A matching pariner would be found, again via the Internet, and the deal executed electronically. The system will greatly

reduce the time needed for goods to clear customs. It will use a standard electronic data interchange package to handle documentation such as contracts, package lists and certificates of origin. Initially, the venture will clear payments itself, but that function will The joint venture, to be later be handed over to Japa-

## N Korean defector causes stir

By John Burton in Seoul

A senior adviser to North Korean leader Kim Jong-il yesterday became the highest ranking Pyongyang official ever to seek asylum in South Korea

Mr Hwang Jang-yop, who is one of the 25 most important officials in Pyongyang. sought asylum at the South Korean embassy in Beijing while returning to North Korea from a visit to Japan.

The surprise defection represented a propaganda coup for Seoul and a useful distraction from the South Korean government's mounting political problems over the Hanbo Steel loan scandal.

Officials in Seoul last night were urging the public to rally behind the government by claiming that Mr Hwang's defection suggested that North Korea was close to collapse.

Mr Hwang is known as one of North Korea's top ideologues and a roving overseas ambassador in his role as secretary for foreign affairs of the ruling Workers' party. No reason was given for his defection. But analysts speculated that he may have decided to defect after his recent mission to Japan to seek food aid and closer ties with Tokyo failed.

Although Mr Hwang is credited with playing a leading role in shaping the policy of Juche, an ultra-nationalistic creed that promotes self-sufficiency, analysts believe that he had been recently adopting a more flexible attitude to the outside world as North Korea's Bank as reported on Februeconomic troubles increased. ary 11.

Mr Hwang, 73, defected with an assistant, Mr Kim Dok-hong, who is based in Beijing and heads a company that exports North Korean workers to overseas pro-

The defections came four days before the 55th birthday of Mr Kim Jong-il. He is expected to use the occasion to prepare for his assumption of the posts of president and party general secretary this year. Mr Kim would succeed his father, Kim Il-sung, who died in 1994.

A North Korean representative in Tokyo denied that Mr Hwang was seeking asy-lum but instead was on his way back to Pyongyang.

The defection has placed China in an awkward position since Beijing, mindful of its traditional friendship with Pyongyang, usually refuses to allow North Koreans to escape directly to South Korea.

Mr Yoo Chong-ha, the South Korean foreign minister, cancelled a visit to Singapore for a meeting of European and south-east Asian officials to concentrate on diplomatic efforts to bring Mr Hwang to Seoul.

## Tokyo warns on N-bullets

Mr Seiroku Kajiyama, Japan's government spokesman, yesterday warned that the inadvertent firing of radioactive bullets by US marine aircraft near Okinawa would open "fissures" in US-Japan relations. The warning came as Tokyo and Washington came under intense public criticism in Japan for their delay in announcing the accident. The incident took place just over a year ago during an air force exercise over an uninhabited islet near Okinawa, the largest US military base in east Asia. Mr Ryutaro Hashimoto, the prime minister, moved quickly to defuse the row by issuing an apology.

US officials justified their initial decision to say nothing on the grounds that the uranium-tipped bullets – used for piercing steel plate - posed no health risks to the island population. Radioactive bullets were mistakenly used because they had been mislabelled, said US officials.

The upset comes at a sensitive time, just as renewal is being prepared for 3,000 lease agreements between Okinawan landowners and the US military, due to expire William Dawkins, Tokuo

## Papers reveal Bofors 'proof'

Indian investigators into 10-year-old allegations of corruption in the award of a \$1.3bn artillery contract to Bofors, the Swedish arms maker, say they have found proof that "payments" were made by Bofors to several individuals. They include Mr Ottavio Quattrochi, an Italian businessman and reported friend of the late Mr Rajiv Gandhi, prime minister at the time of the deal. The investigators said payments to a total of five

individuals were identified in 500 pages of bank documents handed over to India last month by the Swiss government, after a seven-year hold-up in Swiss courts. They said the bank account documents "named" Mr Quattrochi, a former executive in India with

Snamprogetti, the Italian engineering group, whose alleged close association with Mr Gandhi has been widely reported by Indian politicians and in the press. Officials said four others, Mr Win Chadha, Bofors' Indian agent at the time of the 1986 deal, and three of his family members, were also named. Mark Nicholson, New Delhi

### China assails market rumours

China's stock market authorities yesterday fiercely criticised one of the country's leading brokerages for 'spreading political rumours". The China Securities Regulatory Commission said Jiangsu Securities had spread rumours picked up from the foreign media last November. The stern intervention signals a determination that China's notoriously speculative stock markets should not stray into speculation on political developments in

The CSRC said Jiangsu Securities had learnt of the to other traders. The nature of the rumours was not disclosed but in China the phrase typically refers to speculation about the health of the country's leaders or a

## India opens up coal mining to avert threatened shortfall

in New Delhi

India plans sweeping reforms of coal mining. opening it up to private investors - including foreign companies - and moving towards ending price and distribution controls.

It is also seeking \$1bn from the World Bank to help restructure Coal India Limited (CIL), the huge state corporation that dominates the sector.

The reforms, which aim to stimulate coal exploration and increased investment in the industry, are aimed at averting a feared shortfall in coal supplies, in particular for the under-performing power station sector. But the moves to free

prices and to restructure CIL could meet political and trade union opposition. The plans - announced by the coal minister, Ms Kanti Singh - will require parliamentary approval. They will

begin to unwind the 1973 latory body would be set up nationalisation of India's to encourage coal exploracoal industry, the world's third biggest after China and the US and India's most important energy industry. More than 70 per cent of India's coal output, which reached 273m tonnes last year, goes to the power sec-

tor. The rest is mainly for

cement and steel making. Under the reforms, private Indian companies will be allowed to bid for coal and lignite exploration blocks. mine any discovered reserves and sell coal at prices which the government said would be fully deregulated after January 2000. Up to now, private coal mining has been allowed only for a few captive coal users.

Foreign companies will be able to take equity stakes of up to 50 per cent in private Indian coal companies, subject to approval from the government's foreign investment promotion board. Ms Singh said a new regugrade of non-coking coal were deregulated with immediate effect, the rest awaiting full deregulation in 2000. She said the deregulation, fruit of a 2%-year government study, was necessary to prevent the forecast shortfall in coal supplies. The government estimates that coal demand from the power industry alone will rise from 215m tonnes this year to

## the balang Rivals to talk same smartcard language

Schlumberger and Gemplus. the two companies which dominate the rapidly expanding market for so-called smartcards, yesterday agreed to adopt the Java programming language as the common underlying standard for their products.

Smartcards - plastic cards which contain a microprocessor chip - are used in dig-ital GSM telephones, pay television set-top boxes and increasingly for electronic commerce and other applications such as identity verification and delivery of government services such as social security benefits.

Last year an estimated 200m smartcards were issued worldwide, a figure which is projected to grow to more than 1bn within five years.

The agreement between the two French companies. which together account for about 70 per cent of the market for memory and intelligent smartcards, is seen as an important step towards expanding the market for the technology. By ensuring their cards adhere to the Java Card standard, developed by the smartcard manufacturers in conjunction with Sun Microsystem's JavaSoft subsidiary, the two competitors hope to stimulate development of applica-

tions for the technology. The agreement means smartcard applications developed for Gemphis cards will run on a Schlumberger card and vice versa. "This is a very important agreement for the industry," said Mr Jérôme Traisnel, marketing manager for Schlumberger's electronic transactions division, "it is a further indication of the maturing of the

smartcard market." Both Schlumberger and Gemplus have already developed Java-based smartcards, Cyberflex and JCOS1 respectively. They are now inviting other smartcard makers to join the recently formed Java Card Forum which will oversee the standard.

## By Judy Dempsey

The Bank of Israel and the finance ministry are on a collision course over how to tackle the budget deficit, which was unexpectedly high last month at Shk1.3bn (\$390m),

The bank wants immediate tough measures to curb government spending, while the finance ministry is demanding the bank loosen monetary policy. It says this is unrealistically tight, is hampering exports and is maintaining an overvalued

The ministry says it is too early to say how last month's high deficit will affect the year's total but there is concern that the government's attempts to cut the deficit from 4.7 per cent of gross domestic product in 1996 to 2.8 per cent of GDP this year could be put off course.

year's total budget deficit at Shk9.7bn after Mr Benjamin Netanyahu, the prime minister, managed to push through cuts of Shk7.2bn in the 1997 budget,

It has already set this

These cuts encouraged the Bank of Israel to continue

not at the price of compromising its tight monetary policy aimed at curbing inflation, running at 10.5 per cent a year, and still considerably above the 1995 level of 8.1 per cent. Mr Jacob Frenkel, the

Bank of Israel governor, indicated as much this week when he said interest rates would not fall sharply unless the deficit remained on target. The key lending rate is currently 14.2 per cent. The bank also called on the government to take immediate steps to get the deficit under control instead of waiting until April for any further expenditure cuts.

# Budget deficit (as a % of GDP)

**NEWS: INTERNATIONAL** 

director general of the finance ministry, argued that the bank's interest rate policy was not only out of line with inflation; it was keeping the shekel overvalued, which in turn hit exports.

Mr Brodet also warned that the bank's tough monetary policy could be one of the contributing factors in the slowing down of the economy. "Maybe this year's growth in GDP will be closer to 3 per cent rather than 4 per cent," he said.

As if to confirm this, the central bureau of statistics vesterday reported that GDP during the fourth quarter of But Mr David Brodet, last year grew at an annual

Global works council planned

Frances Williams, Geneva

A worldwide consultative works council is to be created by unions to represent 200.000 employees of United Parcel Services, the US-owned global package and courier operator, it was announced in London yesterday. The newly formed body is seeking recognition from the company and negotiation of a global code of corporate conduct and social responsibility to cover UPS's worldwide operations. Union officials from 11 countries have drawn up the plan under the aegis of the

International Transport Workers' Federation.

The main initiative for the new organisation comes from the US Teamsters Union which represents the company's US employees. Union leaders said their priorities were to ensure recognition in all its business operations; an end to sub-contracting and outsourcing of work; health and safety protection for UPS employees in handling heavy packages; and the setting up of internationally accepted human rights standards guaranteeing freedom from intrusive surveillance and searches at work.

The unions plan an "international day of union action" later this year in their campaign to win the company's backing for the council. Robert Taylor, Employment Editor

## Dates set for elections in Algeria

By Roula Khalaf in London

Algerian President Liamine Zeroual has named May 29 or June 5 as dates for the first round of legislative elections.

In meetings with opposition leaders this week, the parties agreed to set up a working group to prepare for an independent commission to monitor the elections.

The poll will be held more than five years after the army cancelled elections the Islamic Salvation Front (FIS) was set to win, sparking a violent struggle which so far has cost more than 50,000

has now ruled out any negotiations with the FIS and continues to insist on eradicating armed Islamic groups through the use of force. The limits of the government's strategy, however, were made apparent in recent weeks, as massacres and bomb explosions became daily events in Algiers and

towns south of the capital.

But the elections are the

cornerstone of Mr Zeroual's policy of remoulding Algeria's political scene into a system which has the facade of a democracy but where the presidency, and the army behind it, retain control. The FIS will not take part They will be held one and a in the elections, casting balf years after Mr Zeroual, doubt on whether they can a former army general, won contribute to a resolution of a landslide victory in presi-

### Bomb shakes Lagos district

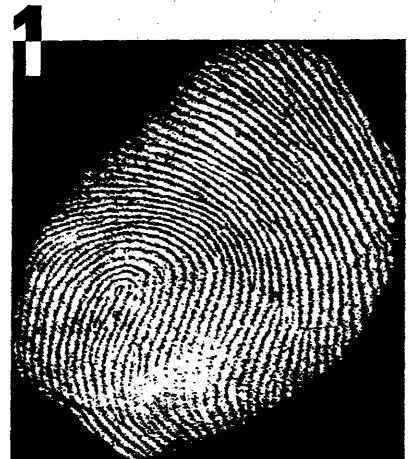

At least five soldiers and a number of civilians were injured yesterday in a bomb explosion in Lagos, Nigeria's commercial capital. It was the fourth attack in the city since December. No credible claim of responsibility has been made but the military-led government has blamed previous blasts on radical opposition groups.

General Sani Abacha, who seized power after the army annulled presidential elections in 1993, last month accused the National Democratic Coalition (Nadeco) and others of working with foreign powers to use terror to disrupt plans to return the country to civilian rule. One western diplomat described the charge as "ludicrous".

Mr Abubakar Tsav, Lagos police chief, said yesterday's device was identical to those in previous bombings. All have targeted military personnel in rush-hour attacks in the city's Ikeia district. The intention seems to have been to cause injury rather than death. Nadeco denies Antony Goldman, Lagos

Mr FitzGerald said on Tuesday articulating the company's position Clarke, the finance minister, who rush into a single currency with non-convergent economies."

On Tuesday, Mr FitzGerald said the UK's failure to be a founder member of Emu was not necessarily damaging as long as the UK remained engaged in the European debate and moved towards eventual membership

But if the UK began to drop out of the single market and "drifted off into the Atlantic", serious issues would arise for companies. The single market was improving the competitiveness of European companies and underpins growth of the European market.

## Sega still riding virtual reality trail

By Robert Wright

The craft swoops low over the city and banks steeply round the skyscraper. The loud speaker barks instructions in an American accent: Watch out in front of vou!" "You've gone too low increase altitude!"

As the craft crashes through an office building and bursts out of the other side, it all feels terrifyingly real - at least, the air sickness it induces does.

The mostly young customers on the Space Mission ride in the \$45m (\$73m) Sega World amusement park, in the Pepsi Trocadero, at London's Piccadilly Circus, spin their heads behind the virtual reality visors they are wearing, desperately searching for the spacecraft they know are on their tail. Their seats rock wildly.

To look at them brings to mind the question that many in the highly faddish world of electronic entertainment are asking: is virtual reality really cool any more?

## music rise 6%

Sales of recorded music continued to grow in the UK last year when the rest of the world music market was virtually static.

The British Phonographic Industry, which represents the UK's record companies. estimates that retail sales of singles and albums, recorded on cassettes, vinyl and compact discs, reached £1.08bu (\$1.76bu) during 1996, an increase of 6 per compared with

. The UK's record companies fared better than their counterparts in other countries, notably the US, France and Germany, during 1996. PolyGram, the world's largest music group, yesterday announced a slight fall in pre-tax profits for 1996.

The UK music market did not emerge unscathed from the global slowdown. Last year's 6 per cent growth was significantly lower than the 11 per cent increase in record sales during 1995, when retail sales passed £1bn for the first time. Profit margins came under pressure across the music

The growth in value sales lagged behind volume for albums and singles because of price discounting by specialist record chains and supermarkets.

Pressure on profitability was most acute in the singles sector, where record companies make discounts on the wholesale price.

The most successful UK act worldwide last year was Oasis, which sold more than an announcement, saying 17m copies of its first two such as Kula Shaker and Dodgy, also fared well.

The UK's success has prompted Japanese group Sony to strike a distribution deal with Independiente, a new IIK record label founded by Mr Andy Macdonald, whose previous signings include Gabrielle.

Half of adults 'face hardship'

quarter of 1 per cent apart".

■ PENSIONS SURVEY

More than half the adults in most regions of Britain – about 17m people - face financial hardship when they retire, according to a survey published yesterday. Mr Daniel Godfrey of investment manager Flemings,

which commissioned the survey from research company Mintel, said: "We have defined financial hardship as retiring on less than 40 per cent of final earnings. In today's terms, 40 per cent of average earnings in Greater London would only be around £8,200 (\$13,366)." The findings prompted renewed calls for the govern-

ment to make pensions contributions compulsory for working people. "This is further evidence that people do not look ahead," said Ms Ruth Lea, head of the policy unit of the institute of Directors, the employers' organisation.
"If the government is serious about lifting the burden of care costs that it will create for the taxpayer, it must introduce compulsory pensions."

### ARTHUR ANDERSEN RULING.

### Government suffers setback

The government has suffered a setback in its 12-year legal struggle with Arthur Andersen over its role as auditors of the collapsed car company De Lorean, which was based in Belfast, Northern Ireland. A US federal judge has dismissed the UK claims - but added that they can be resubmitted in a state court.

Between 1978 and 1981, the UK government invested £70m (\$114m) in US financier John De Lorean's venture to build a gull-winged sports car in Belfast. The company collapsed in 1982 with the loss of 2,000 jobs and in 1985 the UK government sued Arthur Andersen in the US courts alleging conspiracy, fraud and negligence in auditing the company. Andersen's said the judgment vindicated its

## Variety night at Elsinore Palais

HAMLET Kenneth Branagh

IN LOVE AND WAR Richard Attenborough

FIERCE **CREATURES** Robert Young and Fred Schepisi

> SHE'S THE ONE Edward Burns

omething is rotten in the state of Zenda In wedding cake palace filled with gilded courtiers, the dashing prince with the fleur-de-lys moustache and beard (Kenneth Branagh) smoulders with hatred of the usurper king (Derek Jacobi) who has stolen away his father. his mother (Julie Christie) and his throne.

Soon he is seeking help from across the showbiz globe. Jack Lemmon, Gerard Depardieu, John Mills, Billy Crystal as the Gravedigger and Ken Dodd as Yorick (sic) come to his aid, And by curtain-time he is swinging this Ruritanian Tarzan, this Hamlet of Hentzau - from the chandelier, while more guest stars (Robin Williams, Richard Attenborough) open more surprise doors onto the polished parquet. It is like variety night at the Elsinore Palais.

Bravery points should perhaps go to this four-hour Hamlet. banging together the heads of Anthony Hope and William Shakespeare and filmed in a story-book Blenheim Palace cluttered with celebrities. But the populism that served so well in Branagh's Much Ado About Nothing runs out of oxygen in this text's claustrophobic corridors, and there are swift, severe signs of brain damage.

Darkness seems to be anathema to this director. So the ghost-watching scenes are a travelling huddle of well-lit faces bar-

he Sleeping Beauty has

ble and even risible - not least the one which looked like a

in happiest surroundings.

had a chequered history

at the Paris Opera. I

recall stagings improba-

king out reams of uncut exposition - the ears glaze over before the eyes. And though the ghost himself is better, a livid-eyed spectre prone to leave smoking fissures in the earth, this brief taste of gothic is washed away by more megawatt rococo as the film's first half carouses on through madness, conspiracy and soliloguy as if they were party pieces at an overlong Halloween.

The interval comes 2% hours in, with "How all occasions" brayed out by Branagh on a wide-screen battlefield as if it were "Once more unto the breach." And in part two we kill off more characters, while fearing that for every slain movie star Branagh has the purse and perversity to sign up a new one. (What is Attenborough doing, dressed up like some periodised Lord Bafta, in that last scene?)

There are one or two good performances. Jacobi's finely-spoken Claudius pings like best crystalware, a villain whose ringing, boyish plausibility offers echo and reflection to Hamlet's own. Kate Winslet knits Ophelia's tattered passions into a harrowing quilt of madness. And Branagh's prince, though never quite finding the depth and rhythm of greatness, excels in the antic But there is so much silliness.

It may be innovative to make Polonius (Richard Briers) a sleazy, scheming womaniser, but does that fit with his addled, sententious garrulity? Can a man be both fool and knave? And as for the guest stars, God save us from Reynaldos who speak with indecipherable accents (Depardieu) or from a gravedigger (Crystal) who is so busy trying to choose between Brooklyn and Bermondsey for his brogue that he forgets to be funny. In sum, this is a Hamlet for mail-order classics illustrated readers. Everyone else will stamp it "Return to Zenda."

From his more accustomed position behind the camera, Richard Attenborough brings us In Love And War. This first world war love story has nice scenery and

Julie Christie and Kenneth Branagh: a 'Hamlet' for mail-order illustrated classics readers

ARTS

these would make us care were we not strong-armed into attention, as in Lord A's recent Shadowlands, by the film's portrayal of true-life VIP protagonists. Here they are, the young Ernest Hemingway and Agnes Von 1950s, cir. Kirowsky, the Red Cross nurse Fountain. he loved in Italy and later transformed into Catherine Barkley in A Farewell To Arms.

We may not care anyway. As played by Chris O'Donnell, "Ernie" is a puppyish 18-year-old who might have bounded from any American locker room. And though Sandra Bullock wears her unique nimbus of rapt wariness and wry humour, we never believe that this Po valley Florence Nightingale has a real history or identity either. Outside the hospital where our

war correspondent hero rests his wounded leg, Attenborough's Italy is a thing of tourist brochure clichés: the photogenic peasant scything a field in a bucolic long shot, the apartment of the Italian doctor who is Hemingway's love rival which Cleese and lain Johnstone tour performances. But I doubt that overlooks, yes, the Venice Grand the cages, pushing comic lines who wittily took the lid off Irish-

Canal. And when one long scene on a balcony of the hospital is played against a visibly, kitschily painted townscape we know where we are: not Italy in the 19-teens but Hollywood in the 1960s, circa Three Coins In The

an was born free, but everywhere he is in sequels. In Fierce Creatures, alias A Fish Called Wanda Part 2, it is hard to tell which are the true caged animals, those on two legs or those on four. John Cleese, Jamie Lee Curtis, Kevin Kline and Michael Palin, coerced by the tyranny of success, reunite as two Brits and two Americans trying to run an English zoo taken over by a vulgar Australian tycoon (Kline 2, whiskering up as Kline 1's father).

The cacophony of accents make it sound like feeding time at the Shepperton bestiary. Co-writers bars, while the actors try to ape the first film's happy brand of mathematical mayhem.

Creatures is funnier than advance reports suggested: it would almost have to be. Cleese's zoo manager, constantly caught with women or sheep or marmosets, is matched for photogenic frenzy by Kline junior's particidal yuppie. And Curtis is a vivacious, sporty foil

But time and rewrites have made the plot seem more a collection of loose ends than a paradigm of comic logic. And some loose ends already show their age. "Sylvester Stallone didn't get where he is today by appear-ing in Jane Austen," declaims Cleese in defence of his violentanimals-only conservation policy. Unfortunately, Jane is in romping form at the box office right now while Sylvester is heading for the Hollywood glue factory. The week's best film is She's

The One: a charmer from writerdirector-actor Edward Burns.

and comic business through the Catholic New York in The Brothers McMullen. Burns plays Mickey, a fuzzy-mannered young cabbie who drifts into sudden marriage with a beautiful student (Maxine Bahns). But the film's real central relationship is the three-way bond between him, his in imaginary flagrante delicto rectally retentive Wall Street brother Francis (McMullen's Mike McGlone, very funny) and their father (John Mahoney), a citified, not to say certified, redneck forever giving advice that

fouls up his sons' lives.

There is funny byplay with vibrators, boats and the algebra of sexual coincidence (Francis is two-timing his wife with Mickey's ex-fiancée). But the wit is less in the film's props or plot points than in the pixilated timing of scenes of bewilderment. When Mickey tells his pietyspouting father, "You don't even believe in God," he snaps back, "Doesn't mean you stop being a good Catholic." Logic plays no part in a family, or a society, or a religion, where you are brought up to believe first and ask ques-

## Theatre Molière's problem hero

n 1662 Molière scored his first success at writing potent comedy. beyond clever farces and satires, with The School for Wives. It was still half-farce - the aspect that Peter Hall has underlined in his new production: mostly stock characters, familiarly ludicrous situations, a sudden, miraculous denouement in the crazy G&S

At the Piccadilly Theatre, all these are reasonably funny. Besides, Hall has brought in Eric Sykes as a household servant, and urged him on to any number of irrelevant sight-gags; Molière himself an ex-farceur, might have been quite happy about that - or perhaps not. There is nothing catch-as-catch-can about the structure of his play, brilliantly compounded from three old stories with a signal change of focus.

The basic story was about the elderly guardian of a young female person, intending her for his bride but foiled at last by a romantic young man. Another was about a similar chap who raised his ward in unworldly innocence so as to make her impervious to worldly seduction and thereby guaranteed his own cuckolding. The third offered a comic situation in which an illicit lover continually confides in a friend - unbeknownst to him, the betrayed husband. That strand, at least, Hall plays to the

Gillian Kearney acts the innocent ward Agnès with demure naturalness, before she discovers the real world and Love. Her secret swain is Daniel Betts: not the faultlessly pretty and well-spoken youth who would take this role at the Comédie Française, but a wry, intelligent, spirited jolie-laide with nasal vowels. Peter Bowles' hero, or anti-hero, Arnolphe is a problem.

Molière wrote that role for himself, at 40. Half the point of the comedy was to turn the lubricious elderly guardian of the old tale, and the chap who calls down cuckoldry upon himself, into the ordinary bourgeois, middle-aged Parisian Arnolphe like most of the males in Molière's audience. The other half was to transform him from the butt of the comedy to its anguished first-person subject.

But it is already 41 years since Bowles made his Old Vic debut (in Romeo and Juliet); inevitably, intoxication with the dance itself his Arnolphe seems an elderly loser with absurd pretensions rather than an anxious, lusty. thing was ideal in shape and impetus) that spoke of superb still-hopeful cynic. From the start his elaborately mannered Under Vello Pahn, the score airs convey gross amour-propre, sounded very well - though I not the vulnerability of a man who is on the brink of being past and the individual soloists were it. Bowles captures nicely the admirable, notably the violinist embarrassments of a competitor Frederic Laroque to whom fell much too late; but that reduces the lovely Panorama sequence the comedy to its earlier and less which Tchaikovsky made for Leointeresting basis, without the pold Auer, in Paris, as rarely timelessly worrying overtones.

The show is excellently swift (just two hours long), and everybody in it gets time to score his or her own theatrical points. Ranjit Bolt's translation is a curate's egg: it veers glibly between archaic language, florid period-isms old and new, mocktrendy slang and jarring epithets other people are referred to as sods, pricks, berks, twats and shits, but little to do with Molière. None of that carries much dramatic punch; it plays loosely with the original text, but adds nothing to it.

## Beauty with a grandiose look

protracted and hideously expensive advertisement for eyefairy enchantment was a strong shadow. Among the most signififrame for the dance-glories that Petipa had poured onto Tchaikovcant achievements of Rudolf Nureyev's reign over the ballet sky's score. One might disagree was his decision to make the with certain cuts and elisions, and disagree even more with his Russian classics a vital part of his dancers' understanding. The insistence upon giving the Prince results have been in the main a series of solos in the hunting scene which are like a protracted splendid: his Raymonda, Don Quixote and Bayadère stand as and uninspiring ballet-class. But, in essence, this Nureyev version testimony to this, and even his very personal view of Casse is a homage to academic dance. to Petipa, to the monarchic ideals Noisette has enabled the Opéra casts to show their dazzling skills which underpin the action and spirit of this greatest of ballets. The Sleeping Beauty, which Now the staging has been re-Nureyev revered, was a constant designed by Ezio Frigerio and Franca Squarciapino, decorators in his career. He made a succesfavoured by Nureyev. They have sion of stagings over two produced a grand, intelligent decades, each more opulent than look for the ballet. Frigerio has the last. In 1989 he staged it for the Opéra in Georgiadis designs. made a permanent baroque set of

world of Louis XIV's Versailles, which was Petipa's inspiration. Squarciapino's costuming is

sensitive, moving from the heyday of the Sun King's youth (the dress for courtiers and fairles is inspired by the designs made by Jean Berain for court ballets) to the age of Louis XVI, with more than a hint of Gainsborough in cut and even in material (those sprigged skirts that seem a forerunner of every mimsy Laura Ashley fabric that proclaims the glory of dowdiness). There are a few unhappy

moments: the hunt and the vision scene have an oddly cursory air, with the Lilac Fairy as a token presence, and naiads pillars - of the kind usual with dressed in gleaming green that is the Bibienas - which can adapt more panto than fantasy. But, from exterior to interior with given Nureyev's obsessive need

added porticos or back-drops. It is to display the male dancer, and rightly individual ~ and the rituimposing, right, breathing the his Leningrad taste for additions and emendations to a still-credible Petipa text, the staging is opulent, vigorous, (How intriguing to compare the Kirov presentation, where dances and dancers seem equally concerned with the ballet's central lightness of image and its spiritual dimension, with the Royal Ballet's version, which now has the air of national service in inimical territory, and with this revised Paris presentation in which the dancers are eager to display their delight in the challenges offered.)

> he Paris cast, which I saw on Wednesday, is in the main very fine. The complexities that Nureyev brought into the prologue are done with sparkle - the Fairles are enchantingly and an elegance of style, and a near-

als of court behaviour, the sense of hierarchy (thus did ballet mirror the world that sustained it), are clearly stated. I had expected to see Elisabeth Platel as Aurora: she is one of the greatest interpreters of the role that I know. Alas, cramp had struck during the opening night, she was replaced by Karin Averty. A stalwart member of the company, Mile Averty does not display the qualities that I expect of an Aurora, and her reading, for all its vivacities, was not to my taste. Happily her prince was Manuel Legris. Here is a prince among dancers. He went through the varied and thoroughly tiresome exercises that he is set in the Hunting scene with a dedicated air. With the great pas de deux he revealed a dashing ease,

less favourable surroundings). There is a lightness and a spring

to her dancing, a nascent dignity, that give the role its heart as well as its charming dance identity. She is an Aurora in the best Royal Ballet traditions. Alas. most of the rest of the evening

Sleeping Beauty is in repertory at the Bastille throughout February and March.

Economic Viewpoint · Samuel Brittan

## Superpound and the euro

Kenneth Clarke is right not to raise interest rates, but joining the European single currency would - at a price - help ease future policy dilemmas

The determination of Mr Kenneth Clarke, the British chancellor, to reject official advice to increase interest rates was underlined when he declined an invitation to his official residence at that his main concern was to make sure interest rates remained at "acceptable" levels. He feared the rate on the card could rise "very significantly" if the sponsors succeeded in their aim of returning a Labour gov-

The respectable reaction in the financial world is that Mr Clarke is guided by political concerns in the run-up to an election. The hope is that this period will soon be over and that wise, puritanical advice will be taken in the late spring - whichever party wins.

A more appropriate reaction may be almost the Clarke has made the right economic decision, but he will suffer for it politically if an incoming Labour government proves more amenable to official advice and puts the blame on him for delaying an interest rate rise.

This is admittedly a reversal of the line I took some while ago when I supported (provisionally) the Bank of England in arguing for a base rate increase. But there has been no ideological U-turn on my part - simply the same "reaction function" facing a pound which has continued to soar with occasional pauses for breath. It has done so in spite of the repeated refusal of a base rate increase, the prospect of which was supposedly driving sterling

In fact even official advisers are divided. The Bank of England does not believe sterling's rise makes a decisive difference to the inflationary outlook. The Treasury believes it does, but

that interest rates should squeezes the market for still be raised to be on the Both attitudes could change in the face of large

and unexpected exchange acquire a Labour party- rate movements. (It is diffilinked credit card sent to cult to believe the Bank would be so sanguine about Number 11 Downing Street. sterling if the problem were He could not resist adding a weak pound rather than a strong one.) Although sterling has this week come within a whisker of its DM2.778 lower limit when inside the exchange rate mechanism, it is arguable it is still just below the top of an acceptable range - and. while that lasts, it is putting useful downward pressure on inflation.

But should its rise go much further, as it easily could, the present lobby against a strong pound would become irresistible. Not only would the Bank have to stop asking for a base rate increase: it might have to acquiesce in some reduction.

Contrary to what the Bank argues, the impact of a stronger pound does not have to be temporary. For it not only puts downward pressure on import prices (as we have seen from the spectacularly good producer price indices), it also

and thus reduces the growth doing it also puts a damper on the so far very mild signs of pay acceleration about which the Bank expresses anxiety.

As a result, the National

Institute of Economic and Social Research - now one of the most market-based forecasters - has cut its output growth prediction for 1997 from nearly 3½ per cent to 2½ per cent. The latter is all - above the growth of productive capacity. And the National Institute. unlike the Bank, now believes there is a better than even chance of the official 21/4 per cent inflation target being met in 1997 and 1998. It now neither predicts nor advocates a base rate

But just as we have seen an unexpectedly steep rise in sterling, the future could bring unexpectedly steep falls. Should that happen, the unstated implication of the National Institute analysis is that base rates would have to be jerked up sharply anti-inflationary pressure.

Sterling index 1990=100 △ Three months ahead: Six months ahead ☐ Twelve months ahead O Five years ahead November 1

Actual and expected sterling rates\*

August 1 Number of quarters ahead

At present, short-term exports and British goods interest rate changes are the shows that inflation rates competing against imports, only real weapon policy- can, and do, differ even in makers have against undeof demand in the UK. In so sired upward or downward rency area. For instance, in movements in sterling. Although some economists hanker for a larger role for fiscal policy, this is much too cumbersome and slowacting; even the direction of its influence on the exchange rate is intellectu-

ally uncertain. The one apparent alternative to large and jerky movements in either exchange rates or interest a rate only slightly - if at rates - or both - would seem to be the absorption of sterling into a single European currency, assuming that option continues to exist. It was the stratospheric rise of sterling in the early 1980s which started the business lobby in favour of the ERM: similar movements now could spark off a movement in favour of economic and

> There are, however, no free lunches. The economic price to be paid for the abolition of runs into and out of a currency would be the establishment of a single structure of interest rates throughout Europe. Emu opponents say a single interest rate is not likely to be appropriate in the foreseeable future for countries with very different structures and subject to very different inflationary or deflationary pressures.

monetary union.

Such an interest rate would have to be based on some average of European conditions. This would mean interest rates would be judged too high by some countries' inflation rates and too low by others'. So any stimulus to UK consumer spending and domestic cost pressures produced by reducing interest rates independently would still be there if the reduction came about through a European central bank adapting to average member country

The example of the US such a homogenous curthe last US inflation peak of 1980, the Los Angeles Consumer Price Index rose by

15.8 per cent while New York's rose only 11.3 per cent. By 1996, the relative inflation rates of the two cities were reversed. That is not, however,

quite the end of the story. It is reasonable to regard these different inflation figures as local variations on a single US rate. The predominance of interstate commerce ensures that there can be no breakaway movement in which New York inflation soars ever higher above the national rate, while California plunges into deepening deflation. There is no such assur-

ance when there are separate central banks and national policies. If the Bank of England were to reduce base rates towards the German level of 3 per cent to contain sterling at a time when it is warning about double-digit growth rates for broad money, financial markets would cer tainly suspect the government had conveniently forgotten about inflation targets: and there would be no assurance they were

Thus the same UK base rate would have very different implications if it arose from the policy of an independent central bank with a price stability mandate to those it would have if it arose from sovereign British policymakers panicking in the face of a rising pound. The difference lies in the all-important realm of

There is something to be said for stating the stability case for the euro properly, without either ignorantly dismissing it or presenting it as a sort of black magic which would make real problems go away.

BOOK REVIEW - Tony Jackson

FROM PROMISE TO PERFORMANCE:

A Journey of Transformation at SmithKline Beecham By Robert P. Bauman, Peter Jackson and Joanne T. Lawrence Harvard Business School Press, \$27.50, 320 pages

## Prescriptions for a healthy merger

ranked sheer awfulness, carrying out a merger

of equals would probably come near the top. It offers none of the visceral appeal of a takeover: sackings, closures and the pocketing of the spoils. It calls for patience, compromise and the creation of a new culture. And since it is a one-off affair, the odds are nobody involved has done it before.

Unlike takeovers, true mergers are rarely in vogue. They are at present, but only in a few industries: banking. telecoms, pharmaceuticals, utilities. They have usually been prompted by government rule changes and

deregulation. The latest wave began eight years ago with the merger of two drugs companies: Beecham of the UK and the US's SmithKline. As an early response to attacks on healthcare costs, the deal has been widely copied. More remarkably, as measured by stockmarket performance, it seems to have worked.

This book is the work of three key figures in the merger: Bob Bauman, the chief executive, and the personnel and public relations bosses. It claims to be not a history, but a work on management, a text book, in fact, on the merger process.

As generally understood today, the mechanics of merger are: drawing up the new structure, deciding who will run it, setting its operational rules and defining the culture. The SmithKline Beecham merger included all those. It also became entwined with an issue occupying other companies at the time: that of process man-

point when Bauman was of his predecessor, Sir Ronald Haistead.

As an outsider, Bauman spotted the fact that the drugs industry was headed for consolidation, and that Beecham had more drugs in development than it could handle. SmithKline, by contrast, was short of drugs and long on resources.

The strategic logic spoke for itself. The hard bit lay in creating a company to exploit it. In part, this meant erasing the traditions of two companies with 300 years of history between them.

An early step was getting rid of the old guard. Beecham's head of pharmaceuticals had left shortly before the merger. His opposite number at SmithKline soon followed. Within two years of SmithKline Beecham's creation, two-thirds of the combined senior management had vanished.

When mergers fail, it is often because those involved see the task as finite. Smith-Kline Beecham's success depended on continuously moving the goalposts: on forcing an exhausted and occasionally rebellious management to accept that however much had been done, there was always more to do.

The danger point for mergers, it seems, comes at the end of the first phase: the formal integration of the two companies, including plant closures and management appointments. The temptation is to stop there, rather than move on to what the authors call "the soft stuff": creating the new culture.

In SmithKline Beecham's case, much of this stuff agement, or re-engineering. sounds soft indeed. The cul-Less important was strat- ture was officially defined

If managerial ally understood. That had being performance-driven, tasks were been thrashed out in the pre- customer-orientated, innovavious three years, from the tive and so forth - and nine practices. The latter brought in as Beecham's expressed the values in chairman after the ousting terms of employee behaviour, improving one's performance, rewarding others' achievements and so on.

Unsurprisingly, it proved difficult to persuade 50,000odd employees to take this seriously. The breakthrough. it seems, came with a twoweek trip to Japan by the 15-strong top management committee in 1992.

This seems to have been a daring departure in an industry little used to Japanese competition. What the team found struck them as revolutionary: the Japanese method of managing by process rather than function, forcing employees to see their jobs in relation to a set of corporate objectives.

Thus began the third phase: what others might call re-engineering, but here defined as the setting up of a management system to determine behaviour. After two years of this, the authors moved on: but their final assertion - or, perhaps, pious hope - is that the process of change has become permanent in the company.

If so, it is plain where the credit lies. Though the merger was billed as an Anglo-American venture, it was scarcely so in fact. The science may have been largely British, and the headquarters in London: but it was mostly Americans, from Bauman down, who had the energy and foresight to make it work. For a European, it is a faintly depressing conclusion

## Great deal of experience behind | Cutting cost Chernobyl recommendation

From Professor John Surrey. Sir, I wish to correct a couple of points in your article 'Chernobyl closure plan hits snag" (February 8/9). The study to which you refer was carried out not by the Science Policy Research Unit but by an international panel of experts which I chaired. The panel contained a great deal of experience of running and regulating large electric utilities in the west, as well as expertise on energy economics in general and the economics of nuclear power in particular. We carried out an independent, impartial economic sment of completing two partially built nuclear plants, as we were required to do. Since we were as keen

as anyone else to see Cher-

nobyl closed, our report suggested that the western loans for completing the two reactors should be made available instead for an alternative package of measures which the panel believes would provide significant economic benefits

for the Ukrainian people. Whether our report is "out of touch with the realities of life in Ukraine" is not for me to judge. The press will be in a much better position to make that judgment when our report is released by the European Commission, the European Bank for Reconstruction and Development and the US Department of State. Meanwhile, the figures at the end of your article show that Ukraine currently

plus generating capacity over winter peak demand: no new generating capacity is needed for many years. What the Ukrainians are

short of is cash to buy fuel for their existing plant. Resuming construction on two nuclear plants which cannot make any contribution to electricity supplies for more than three years will do nothing to solve this problem and, if it deflects resources from uses with a more immediate and better pay-off, may make things

## Polish economy is still soaring after reforms

From Mr Grzegorz

Sir, You are right that my departure from the Polish government had been masterminded for some time ("Reformer picked as Polish finance chief" and "The eagle has landed". February actually since last July, when my country joined the Organisation for Economic Co-operation and Development. However, it was still necessary to succeed with the implementation of the "Package 2000" programme, which happened in November, when parliament

decreased taxes along the

the economic ministries were reformed at the beginning of this year.

Ultimately, a reasonable budget for the election year has been adopted and the next programme, "Euro 2006", launched. You are right that President Aleksander Kwasniewski is the only person I listened to. although not when he asked me to stay longer as first deputy premier for the economy and finance minister. But you are wrong to say the Polish eagle has landed because it is still soaring and

lines I proposed. Therefore,

Gross domestic product expanded during the last three years by more than 20 per cent, while unemployment fell 3.5 points and investment soared 39 per cent. And more than \$10bn of foreign direct investment has been absorbed - some

\$6bn in the last year alone. But the biggest achievement of "strategy for Poland" is the fall in the flying as high as ever before. ratio of public debt to GDP

(from 38 per cent in Decem-

ber 1993 to 18 per cent in

January 1997) - not by 10

points, as you suggested.

Actually inflation dropped from 86 per cent in 1993 to as during my term by 20 points low as 49 per cent in 1997. So, I have returned to policyorientated research since my aims have been completed and now I would like to take advantage of my experience to support the process of transition elsewhere

FINANCIAL TIMES

## The EU and Asian rights

Foreign ministers from the EU Commission's recent threat to and the Association of South East Asian Nations (Asean) meet today in Singapore. On Saturday they will be joined by colleagues from China, Japan and South Korea, in the first regular meeting after last year's summit in Bangkok,

Europe's interest in contributing to and benefiting from the east Asian economic success story is obvious enough and is on the whole reciprocated. Some Asians are sceptical about how much Europe really has to offer economically, but even they generally wish to see Europe play some part in the region, so as not to leave the task of balancing China's rising power solely in the bands of the US. The two regions also have a common interest in helping to manage the global order, if only by co-ordinating attempts to influence the remaining superpower.

In seeking to go beyond these general feelings. European and good idea, so long as the junta Asian governments face two challenges. One is the difficulty Aung San Suu Kyi's democracy of finding anything much on the movement. Equally, Portugal economic front that they can do better together than in global forums such as the WTO. The other, which threatens especially to bedevil today's meeting with Asean, is contrasting attitudes to human rights.

kept separate. Asean states are if not to air such differences in entitled to complain that the a civilised atmosphere?

revoke Burma's tariff privileges, in protest against its alleged use of forced labour, deviates from that principle, contrasting sharply with the EU's position on trade with Cuba.

What they are not entitled to do. however, is to insist that human rights be kept off the agenda of today's meeting. The whole point of foreign ministers' meetings is to bring about a broader political dialogue, in which governments can exchange views, most of all perhaps on subjects where they disagree, without the disagreement affecting normal trading relations between their citizens.

European governments are by and large unpersuaded that eco-nomic sanctions are a good way to influence the behaviour of Burma's ruling junta; but they are equally unpersuaded that Asean's intention of admitting Burma as a full member is a refuses any dialogue with Ms cannot shrug off its responsibility for the fate of East Timor so long as Indonesia refuses to let the people of that territory express their views. Europeans do not necessarily expect to convince their Asean interlocutors On the whole both agree that on either point. But what is the human rights and trade are best point of a meeting like today's,

> The new president until 1998, Mr Fabian Alarcon, will not have an easy task, even if Mr Bucaram does not return to Ecuador to foment trouble. Government spending needs to be kept under control. If not, the economy will suffer either higher inflation, or recession. The people of Ecuador have already indicated what they think about price rises and pri-

vatisation. Nonetheless. Ecuadoreans have rid themselves peacefully of a bad government. It is to be hoped that they do not expect to depose every president who takes an unpopular decision. But the episode may even make voters think twice in future and terity he was pressing on the avoid candidates who make promises they cannot possibly

### **COMMENT & ANALYSIS**

## Into the east at full throttle

Low costs and fast growth are persuading some leading carmakers to open plants in central and eastern Europe, says Haig Simonian

28-year-old maintenance engineer, earns the equivalent of DM700 (£250) a month at Audi's engine plant in Gyōr, western Hungary. In the Czech Republic to the north, Mrs Vaclava Buriánková, a 48-year-old body-shop worker, takes home the equivalent of about DM650 at Skoda's car plant in Mlada Boleslav.

Both could make around eight times as much in Germany. Such huge disparities are one of the reasons why some of the world's leading car companies have invested in central and eastern Europe since the collapse of communism in the early 1990s.

"For west European carmakers, faced with near permanent overcapacity and low trend growth, the prospects in the east are too tempting to pass up," says Mr Simon Miller, automotive analyst at UBS Securities in London.

More than \$8.9bn (£5.3bn) has been committed to new plants in the region in the past six years by the four biggest investors: Germany's Volkswagen; Adam Opel, the General Motors German subsidiary; Fiat of Italy; and South Korea's Daewoo. Spending by the less ambitious Suzuki of Janan and Rord of the IJS takes the total to more than \$9bn.

Low pay is not the main reason. why they have headed for central and eastern Europe. While investment grants and tax incentives have played a part, soaring demand on the back of generally buoyant economic growth has been the main draw when sales in traditional markets such as the IIS, western Europe and

Japan have been sluggish.

The explosion in sales in the former East Germany shows the potential. Registrations exceeded 777,000 units in 1992 - the peak year of a post-reunification boom - compared with a fraction of that in the former German Democratic Republic. Although sales have fallen since, they have stabilised at about 600,000 units. And although demand in

decisively upwards. Poland - the biggest and most populous country in the region - was Europe's fastest growing car market last year. Sales jumped 41 per cent to 373,542 units, making it Europe's eighth biggest new car market, according to Samar, a local consultancy. Registrations should hit 450,000 by 2000, it reckons.

Republic and Slovakia has also

been volatile, the trend has been

Sales in the Czech Republic reached 128,701 units in 1995 from 104,142 the previous year. In Hungary, sales have yet to exceed their peak of 90,000 units in 1994. But after collapsing to 68,800 following a government austerity package in 1995, registrations climbed last year and should reach 76,000 units in 1997.

Volkswagen, Europe's biggest carmaker, has led the investors into this new market. This has been partly the result of political pressure after reunification - the group is 20 per cent owned by the west German state government of Lower Saxony. It will have spent DM3.2bn on new car and engine plants in the former east

Germany by 2000. VW has also invested elsewhere in the region. It has allocated DM3.7bn to acquire and modernise Skoda, the Czech Republic's leading carmaker, by 2000. In Hungary, VW's Audi subsidiary expects to have spent DM1bn over the same period. More modestly, the group has also invested in Slovakia and

Opel has been almost as ambitious. It has ploughed DM500m into a showcase new "lean production" car factory at Eisenach in the former East Germany. The lessons learnt at Eisenach will be incorporated at the DM500m plant under construction in Poland, to supersede a DM30m assembly unit in Warsaw. A further DM700m has been invested to assemble cars and engines in Hungary.

Fiat and Daewoo have concencompany has spent \$1bn on director of Opel Hungary.

r Peter Bognar, a Poland, Hungary, the Czech acquiring 80 per cent of FSM now Poland's biggest carmaker. Another \$800m is going into two new models by 2002. Daewoo's ambitions are so big it has bought two Polish vehicle-

makers since 1995. The largest, FSO, is being groomed to build a new generation of Daewoos now taking to the roads in Korea. The boldness of these four car-

makers contrasts with the caution of the other car companies. Although others concede that demand will eventually rise significantly, they are much more pessimistic about the immediate potential for sales growth.

Such arguments often disguise self-interest: many of the financially strapped European carmakers face overcapacity in their home countries. Many would prefer to export vehicles from their domestic plants rather than to build new factories in central and eastern Europe. They argue that it will be easier to export to the region once countries such as Poland and Hungary join the European Union and have to cut high tariffs on imports.

investing in low-wage economies are limited: pay accounts for no more than 10 per cent of the costs in a capital-intensive car plant; and wage levels are rising fast in these countries.

The big investors acknowledge salaries are climbing. But they say it will be years before they reach Spanish or UK levels, let alone those in western Germany. Even after reunification, pay in the former communist east is still 15-25 per cent below that in the west - and that ignores the more generous fringe benefits in the latter.

The big investors emphasise the importance of gaining an early foothold in these growing markets by establishing local plants. "A local presence is essential to building goodwill," says trated on Poland. The Italian Mr Albert Lidauer, managing

their investments to serve a engine unit for the past two wider region than just the countries in which they are located. General Motors last month said its Hungarian operation would lead its push into the Balkans. Both companies also have their eyes on a bigger prize - the vast but still untapped markets of the

Meanwhile. Daewoo sees a double benefit in Poland: local production will provide a back-door to sales in western Europe if exports from Korea were ever threatened, as well as a bridgehead to the east.

former Soviet Union.

And the evidence suggests the spoils will indeed go to local manufacturers. Opel has led Hungary's car market for the past five years, with more than 20 per cent of sales in 1996. Suzuki, another local manufacturer. came second with 19 per cent.

In Poland, Fiat took 42 per cent of sales last year. Together with Daewoo (26 per cent) and GM, the three biggest brands accounted for more than 75 per cent of sales

Such data may explain why hey also point out Toyota, Japan's biggest car-that the advantages of maker, which has so far steered clear of building cars in the region, is having second thoughts. Mr Akira Yokoi, its head of international operations. says it is now looking closely at local production.

But there is a special reason why German carmakers have been in the vanguard. Their greenfield factories in eastern and central Europe are convenient test-beds for more flexible production methods. which would be resisted by their unionised workers in Germany.

"When you start from scratch, you can be very efficient," says Mr Lorenz Köstner, head of VW's east German engine plant.

Moreover, the threat of shifting investment to the east has given management a lever to negotiate productivity concessions from their traditionally pampered domestic workforce.

The Chemnitz plant, which has

However, Opel and VW expect been VW's most productive years, contracts out dozens of tasks which would be done by VW workers in the west, to cheaper third parties. Similarly, Audi chose to assemble its new sports cars in Hungary because its highly flexible contracts suit a model for which demand will be very seasonal, says Mr Karl Huebser, managing director of

Audi Hungaria Motor. VW and Onel know they must tread carefully to avoid being accused of "exporting" jobs to the east or of "blackmailing" their west German workers into giving up hard-won privileges on pay and conditions.

Such concerns can provoke some extraordinary corporate doublespeak. Last year, Mr Adreas Schleef, Audi's head of personnel, justified the decision to shift work to Gvör because it corresponded to the company's strategy of "enhancing our competitiveness, corporate growth and safeguarding employment, each of which influences the oth-

ers in a kind of magic triangle". But there is no alchemy behind tions. They believe much of what is being learnt at the new plants in the east will eventually be applied at home. "Whether for VW or Opel, the aim is to transfer the experience back to western Germany." says one executive who has worked for both companies.

Mr David Herman, Opel's chairman and a tough-talking former lawyer, is characteristically succinct. "We have expressed, through our decisions the element that time is pressing. Having a new plant on your doorstep is different from having it in

High-cost manufacturers like VW and Opel believe they have no other way to fight the threat of rising imports from lower-cost Asian rivals in western Europe. For them, the factories in the east are vital lifelines to developing new markets for tomorrow and to protecting those of today.

## **UK** rates

It was not a happy fourth This compromise between the birthday for the Bank of Treasury's desire to keep con-England's Inflation Report, trol and the view that the Bank released at 11.30 am yesterday. should be made more indepen-At that time, the doors of a packed conference room at the Bank were opened and the press were let out to tell the world the February report's conclusion: that the UK government will miss its 2½ per cent inflation target and that interest rates should therefore rise.

The timed release of this carefully argued document was to ensure that no reporter could misuse market sensitive information. But the Bank need not have bothered. Three hours earlier on BBC Radio's Today programme, Mr Kenneth Clarke, the chancellor, had spilled the beans in his breezy way. And the Bank was wrong, he added. Inflation was falling and interest rates need not rise.

This is no way for the chancellor to treat the Bank, especially as it might suggest that he is more interested in winning the next election than in UK inflation two years hence. The quarterly Inflation Report was established after the UK's humiliating fall from the European Exchange Rate mechanism

in 1992. It was part of a necessary attempt to secure for the Bank a more independent role in setting monetary policy. It provides the analysis behind the views of Mr Eddie George, the Bank's governor, at his regular going further, towards full indemeetings with the chancellor. pendence for the bank.

dent has a serious defect, which yesterday's events illustrated. The Bank is obliged to give careful reasons for its opinions. The chancellor can wave them aside in a wreath of cigar smoke, if he choses.

Yesterday's argument turns mainly on the question whether the 16 per cent rise in sterling since last summer provides a sufficient anti-inflationary jolt, while posing also a threat to industrial recovery. Mr Clarke presumably thinks so. But as he is not obliged to say whether Treasury officials agree with him or why, he must come under suspicion of being fogged by political make-believe.

The Bank, on the other side, may be suspected of shouting rather loudly to be heard among the electioneering cries. Yet it has pressed consistently for a moderate rise in rates, for which there are strong prudential arguments. If the Treasury is more worried about recovery, this should be explained carefully to the governor (and later made public in the minutes), not dropped casually into a

radio interview. The new arrangements after 1992 were intended to take some of the politics out of interest rate decisions. Yesterday's events strengthen the case for

Trailblazing Alberta

■ Ralnh Klein has a message for Alsin Juppe and other embattled European Union leaders struggling to meet the single currency criteria - eat your

hearts out. Klein, premier of the Canadian province of Alberta, has succeeded over the past five years in turning a record budget deficit into a healthy surplus Buoyant oil prices have beloed, but Klein has also cut a swathe through supposedly sacrosance government programm Spending on healthcare and

education is down about 15 per cent. Hospitals have been closed and welfare rules tightened. The civil service has shrunk by a third, with 10,000 jobs axed: So presumably the good-

citizens of Calgary and Edmouton are taking to the streets in protest? Quite the confrary. According to the polls, Klein's Progressive Conservatives enjoy the support of 80 per cent of decided voters: No one will be surprised if they sweep up every legislative seat

in elections that Klein has called

Politicians in other parts of French speaking Quebec, have Canada, including successfully followed Alberta's recipe. So enough of those quips

for March 11.

OBSERVER. they're actually very sensible:

Seventh sealed

Signs at last that the tide may be turning in Switzerland's favour in the row over its record in the second world war. It has decided not to set up another committee in addition to the six already trying to deal with the

Switzerland's first response to the row was to ask Paul Voicker, former chairman of the Federal Reserve, to chair a committée to check whether Swiss banks were still profiting from the dormant bank accounts of holocaust victims. When this failed to calm things down, it set up a askforce. The taskforce hasn done much good either, and at the last count six special

Ryerybody expected the Swiss government to announce a seventh yesterday. But in an uncharacteristically firm move, it has abandoned plans to create a high-level group to co-ordinate strategy. It felt there were enough committees doing that already. Oh surely not 👯 😁

committees were trying to sort

out the mess.

Bad timing

TOfficials preparing for the European single currency are

finally getting to grips with mundane practicalities. The result could be a change in the

timetable for swapping our francs, D-Marks and, maybe, pounds for freshly minted euros. On present plans, euro notes

and coins are due to go into

circulation on January 1 2002. three years after exchange rates are locked. But it has just dawned on officials that the week after Christmas is the worst time to make the switch. Millions of shop assistants will have to be retrained to use the new currency ~ and literally billions of items will have to to be re-priced.

Retailers won't have enough time during the pre-Christmas rush and are not thrilled at the prospect of the changeover wrecking their January sales. Word has if that the switch could be brought forward to the summer of 2001; or euros may have to be phased in gradually alongside national currencies.

Taxing problem

There was exhaustive analysis and speculation in the French press yesterday concerning a notable increase in the number of marriages (up by 10 per cent) and births (up by 6,000) recorded last year. Unromantically enough, the increases are probably more to

do with a change in the tax laws

last year, making simple cohabitation fiscally less

attractive. But there is a national obsession with demography, one that perhaps extends to the highest levels of power. If the government caves in and lets many more of its workers retire at 55, as they are demanding, an increase in the birth rate will come in handy to fund the pension bill.

Donkey work ■ Delegates to a London conference this week on Britain's place in Latin America's growing economies gained an unusually candid

insight concerning President Rafael Caldera of Venezuela. Ramon Illarremendi, the presidential external affairs adviser, began his address to UK captains of industry thus: "I am the president's adviser, but I don't know why I bother. He doesn't listen to a word I say." He then described the octogenarian President as the sort of man "who swallows down

pineapple." We don't know what that means, either, Appounding that Venezuela was doing good things with its economy - he wasn't quite sure what - Warremendi concluded that he might be in danger of

losing his job, and sat down.

## World Bank offers US Berezovsky incentive to fund IDA

By Robert Chote in London

The US administration's hopes of securing about \$1bn from Congress to help finance the World Bank's interest-free loan facility for poor countries have been boosted by an unexpected climbdown by the scheme's big European and Japanese

Bank's International Development Association (IDA) agreed in Paris last week that US companies should be allowed to bid for up to an extra \$980m of contracts financed by IDA loans even though the US remained in arrears on its IDA contributions. But IIS companies could bid only if Congress provides the money which the administration has promised for IDA but has so far been unable to pay.

IDA offers interest-free loans to 79 countries which had a per capita income less than arrears this year and to make \$905 in 1995 and which cannot an \$800m contribution to IDA

World Bank on market terms. totalled \$97bn, financing protion and water supplies.

Last year the IDA donors spend the 1997 financial year paying off its arrears, while the rest contributed to a one-Contributors to the World off \$3bn trust fund which would finance IDA loans agreed during the year. The Europeans and Japanese insisted that US companies should not benefit from contracts financed by this fund.

The US Congress was furious about the procurement restrictions and gave the administration only \$700m of the \$934.5m it requested, leaving \$234.5m in arrears outstanding. US officials told last week's meeting that the administration would request enough money to pay off the

Since 1960 these loans have hope that by offering to lift the procurement restrictions on jects from agriculture and around a third of the trust rural development to educa- fund, the administration will be able to present this to Congress as a diplomatic triumph agreed that the US should and thereby secure the money it is looking for. But some officials fear that their governments may regard this as too big a concession to the US, so there is a two-week period for

> Mr David Gordon, at the Overseas Development Council in Washington, said the deal should help the US Treasury department press the case for

IDA in Congress.

Mr Gordon added that it was almost inconceivable that Congress would agree to pay all might be possible. He said that \$917m is the real target which would be a great achievement. The non-US donors agreed to

meet at the end of this year to assess procurement restric-

## sues Forbes magazine on 'mafia' allegation

By Chrystia Freeland in Moscow and Arkady Ostrovsky in London

Mr Boris Berezovsky, the controversial Russian busisman and deputy head of the security council, yesterday launched a high-profile bid to clear his name in the west.

Mr Berezovsky yesterday issued writs for libel in the High Court in London against Forbes, the US magazine. He is employing Mr George Carman QC, Britain's most feared libel advocate, and Peter Carter-Ruck and Partners, the prominent libel law firm.

He alleges Forbes defamed him in a December article that claimed he had links with the Russian mafia and had been connected with the ganglandstyle assassination of a promi-nent Russian television pre-

senter. The public suit is part of a growing effort by Russia's business leaders to shed the often sleazy image Russia's fledgling capitalists developed immediately after the collapse

Mr Andrew Stephenson, a solicitor with Peter Carter-Ruck and Partners, said yesterday: "The magazine has made very serious allegations against Mr Berezovsky, accusing him of murder." It "appears to be very short on detail and facts. It was calculated to defame Mr Berezovsky." He said the writ was issued with Mr Nikolai Gloushkov. first deputy managing

yers did not rule out suing other newspapers, including the Moscow Times, which had repeated the allegations. The article in Forbes linked Mr Berezovsky to the murder of Vladislav Listiev, a popular television talk show host, who, according to the Forbes article.

director of Aeroflot. The law-

stood in Mr Renezovsky's way. Mr Berezovsky is one of seven Russian businessmen who bankrolled the re-election campaign of Mr Boris Yeltsin and wields great political

power in the Kremlin. Mr James Michaels, editor of Forbes, said yesterday he had not been informed of the writ but stood by his magazine's article. He added: "I find it very curious that Mr Berezovwaited three months before objecting to the article." Mr Stephenson said Mr Bere zovsky had chosen London because the "British legal system offers an effective and independent forum for Mr Ber-

ezovsky and Mr Gloushkov to Forbes a chance to apologis in a formal statement to the court." Under US libel law, it is almost impossible for public figures to contest successfully claims where they feel they have been defamed

## THE LEX COLUMN Tarnished gold

These are nervous times for gold bulls. Normally a price fall to below 2173.2 (+10.0) \$340 an ounce would be an unambiguous buy signal for gold shares. The average bullion price over the past decade has been \$385 an ounce. Given that historical prices play a big role in the market, the chance of gold staying at its current low level appears slim. Sentiment, how-

ever, is also a big factor, and worries about central bank sales hang like a dark cloud over the market. Moreover, shares are not particularly cheap. Prices have not fallen in line with bullion. When the bullion price was last at current levels. in 1992, the FT Gold Mines Index was in the 1000-1200 range. Now it is just below 1700, with North American and Australian producers mostly towards the upper end of their historical valuation ranges. Prices have been buoyed by the continued merger activity in the sector and the general strength of

world equity markets. South African gold shares look more enticing, they offer better value, provide the purest play on the gold price, and industry restructuring initiatives augur well. But even here there are grounds for caution. Last year foreign investors were burnt by the collapsing rand. Perversely, the rand is staging an enthusiastic recovery just at the point when the bullion price is plunging. The combination is hardly an enticing backdrop for the South African gold sector. Gold shares will have their day, but buying now is probably premature.

### South Korea

As an election year backdrop, it is the stuff of nightmares. In the final year of Mr Kim Young-sam's presilency in South Korea his attempted labour reforms have backfired, the collapse of the Hanbo conglomerate has brought the banking system to its knees, along with a growing number of cabinet colleagues, and the economy meanwhile is slowing down to 1992's depressed levels. And yet the Korean stock market as surged so far this year.

And is more efficient than keeping The hope has to be that things piles of its own cash. are sufficiently rocky to force structural economic reforms. But in an managers do not need the bulging election year, governments rarely pockets of a Deutsche Bank. As launch initiatives which yield such, it could puncture some of the short-term pain for longer-term ben-efits. Mr Kim cannot be re-elected bid speculation swirling around MAM in the wake of the Dean Withimself, but he wants to dictate a victorious succession. And the ter/Morgan Stanley merger. Many banks would undoubtedly like to flerce reaction to his initial labour snap it up. But, given that fiercely reforms will have subdued his appeindependent MAM has no need of a

appear in the funds it manages.

Putting such a facility in place for a

rainy day is a sensible precaution.

The move also shows that fund

hardly looks the perfect cure.

shares looking pricey. Following a recent surge, the stock trades on roughly 21 times current year expected earnings. That is racy since the equity bull market is long in the tooth. Even without a sharp correction, share prices are unlikely to keep rising at the same rate. And given that fund managers are a geared play on the market, a slowdown would curb the growth in MAM's earnings. Of course, if a bid materialises, the current share price will be validated. But inves tors need to be clear that this is why they are buying the stock.

### European banks

European bank stocks have made breathless start to the year. Italians have led the charge, with the share prices of Credito Italiano up 50 per cent and BCI 35 per cent Most of the larger German and French banks have made gains above 15 per cent. Only the Swiss have lagged behind, with the big three all showing advances below 10 per cent. Can these moves be justified? ernment policy, are in no position

Investors who have seen banking stocks underperform their local markets by 20-30 per cent over the last five years could be forgiven a measure of scepticism. But the present rally is not without foundation. The operating environment is more positive - the upturn in the Euro pean economy should help banks interest earnings, although invest ment banking profits may be vul nerable. In some cases, particularly France, the shares were very cheap following dismal underperformance in 1996. Finally restructuring, previously the exclusive domain of Anglo-Saxon banks, has crept on to the agenda.

This is all good news, but not quite the bonanza some are expecting. Markets have fully discounted ambitious restructuring stories which are, at best, in their infancy. Anyway, in some cases even ambitious cost-cutting is unlikely to compensate for the shrinking revenues and tight margins that accompany low inflation. The upshot is that most German and Italian bank shares look overvalued. By contrast, French and Swiss banks offer better value, notwithstanding the restructuring constraints which the French in particular face.

COLUMN

## Thomson-CSF sale setback

The privatisation of Thomson-CSF, the French defence electronics giant, appeared to be threatened by further delays after Lagardère, the missiles and magazines conglomerate, submitted an appeal to the Council of State. The appeal is thought to relate to last year's failed attempt to privatise the Thomson group. The process was suspended after an independent commission rejected the terms of the Lagardère bid.

Gas shareholders back demerger The overwhelming majority of the 473 British Gas shareholders who turned up to vote on the company's proposed demerger backed its separation into BG plc, the pipeline and international exploration and production business, and Centrica, the domestic gas trading and supply company. Page 26

Gold falls to four-year low Gold fell sharply yesterday, hitting a near fouryear low on concerns about selling by central banks. Shortly before midday in London the price dropped below \$337 for the first time since April 1993. It rallied later but was still off \$1.80 at \$337.70 by the afternoon fixing. Page 22

Weaker yen helps Canon rise 56% Canon, the Japanese maker of office equipment and cameras, announced a 56 per cent jump in parent recurring profits. The increase was fuelled by strong demand for computer-related products and a weaker yen. Page 17

Nippon Paper, which owns PolyGram, the Dutch entertainment group which 21.91 per cent of Japan Paper Industry and 98.27 per cent of Jujo Paperboard, will receive this week received 14 Oscar nominations for its 1996 films, yesterday forecast a return to four shares in Japan Paper growth in 1997 after two years Industry for each of its Juio of static profits. shares. That will increase Nippon Paper's stake in Japan

Mr Alain Lévy, president, who issued a profits warning last October, anticipated another year of losses for the film division.

However, Mr Lévy expressed confidence that conditions in the global music market would improve after last year's "temporary hill", which triggered a slight fall in pre-tax net income to Fl 722m (\$384.4m) from Fl 741m in

88.50 yesterday.

Shares rose by Fl 5.20 to Fl

domestic users of paperboard have demanded lower prices. Japanese paperboard manufacturers are also seeing increasing competition from foreign manufacturers with

Taiwan, Analysts say they need to lower costs to survive. Against this background, the profitability of paperboard makers has declined sharply. Settsu, a leading manufacturer, saw its parent operating profits plunge from Y7.6bn (\$61.8m) in the year to March 1991 to Y4.9bn (\$39.8m) in the

lower costs, particularly

last financial year. Japan Paper industry's oper ating profits have also suffered, falling from Y4.1bn (\$33.3m) in the year to December 1991 to a forecast Y1.9bn

(\$15.4m) in 1996. The latest merger will benefit the companies but is not expected to lead to significant improvement in the market

Mr Jeff Saknowitz, industry analyst at HSBC James Capel in Tokyo, said: "Since it is very, very difficult to increase the prices of paperboard, the key to improving profits is to

The merged group will be able to achieve savings by concentrating production of overlapping products at specific facilities, raising economies of scale and rationalising distribution.

Mr Saknowitz said further consolidation would be required to improve the overall situation in the industry,

"This is not going to do to the paperboard industry what the mergers in 1993 did to the paper industry," he added. The mergers of Jujo Paper and Sanyo Kokusaku to create

Nippon Paper Industries, and of Kanzaki and Oji to create New Oji, created two giants able to stabilise prices in the paper market. But the paperboard sector is still fragmented, with some 30

to extend the Ronnskar copper companies making paperboard, 300 companies turning that into corrugated sheet and a further 3,000 making the sheets into corrugated cases.

### return to growth operating income stabilised at profits warning last October. Fl1.08bn, and net income per anticipated another year of share fell to Fl 4.01 from losses for the film division. PolyGram plans to invest up to \$15m in setting up a US film distribution

network. Mr Lévy said he hoped the film subsidiary, which broke even during the second half with negligible profits of

Fl 2m, would move into the black "from 1998 onwards". Group net sales grew by 7.8 per cent to F1 9.49bn from Fl 8.8bn last year. However,

Fl 4.12 before extraordinary charges of Fl 160m. to cover restructuring at Motown Records and the classical music division. The board proposes a dividend of Fl 0.95. PolyGram's film division

saw sales increase by 25 per cent to FI 1.54bn, after the success Sleepers, which has taken \$130m at the box office, Trainspotting, Dead Man Walking and Fargo. Other pictures, notably Portrait Of A

division reduced its losses by 49 per cent during the year. Mr Lévy cited The Game, starring Sean Penn, and the film version of Mr Bean as promising releases for 1997. PolyGram's music division mustered sales growth of 5 per

Lady, performed below

expectations. However, the

cent to Fl 7.95bn. co industry-wide growth estimated at 3 per cent. Its record labels released 34 albums that sold over 1m copies in 1996, against 31 in 1995. None of those albums sold more than 5m copies.

The dearth of 5m-plus hits depressed profitability while the cost of promoting new releases escalated.

Music calls tune at PolyGram,

## Swedish mining division to have Toronto listing

Trelleborg to concentrate more on rubber and trading operations

By Greg McIvor in Stockholm

Trelleborg, the Swedish mining, metals and rubber group, is to list its Boliden mining and metals unit on the Toronto stock exchange later

this year. Boliden is Trelleborg's biggest division, accounting for about 40 per cent of sales and almost half of its profits. It will continue to be led by Mr Anders Bulow, managing director, but will be based in

The listing, which had been expected by analysts, marks a further narrowing by Trelleborg of its focus to rubber and trading operations. It follows the \$1bn disposal of a 28 per cent stake in Capada's Falconbridge mining group

Mr Kjell Nilsson, Trelleborg chief executive, said the decision to list Boliden was a response to internationalisation in the mining and metals industry and Boliden's need to generate cash for

investment. He said a Canadian listing would be a springboard for Boliden to expand in North America and South America, where it would gain greater access to zinc and copper The strategy included plans

mine in Sweden and to explore further mining projects in Sweden, Trelleborg said. The decision to float Boliden helped to lift Trelleborg shares krona.

by SKr2.50 to SKr119.50. The shares have risen 45 per cent in the past three months amid hopes of a recovery in metals prices and expectations of Boliden's spin-off. Mr Peter Dupont, metals

analyst at Union Bank of Swit-

zerland in London, said the

decision to list in Toronto the world centre for mining and metals stocks - would probably confer a higher rating on Boliden than if it were listed in Stockholm. Boliden's operating profits were reduced by lower metals prices last year and fell from SKr703m (£57.5m) to SKr362m

on sales down from SKr8.7bn

to SKr7.9bn. The operating

margin fell from 8 per cent to

4.6 per cent. Trelleborg said it intended to float around half the shares in Boliden and keep the rest as a long-term holding.

The sale would be directed at investors inside and outside Canada, with no pre-emption rights for Trelleborg share-

adviser to the issue. Trelleborg yesterday announced a 71 per cent fall in full-year pre-tax profits, from SKr3.5bn to SKr1bn. Turnover

The results were in line with expectations and reflected lower copper prices in 1996 and weak economic activity in Europe, as well as a stronger

## INTERNATIONAL NEWS DIGEST

## Standard Bank lifts assets 26%

Standard Bank has eclipsed Amalgamated Banks of South Africa as the country's largest banking group, after reporting a 26 per cent rise in assets last year. Total assets rose from R101bn to R127.8bn (\$30bn), helped by a 27 per cent increase in after-tax profit to R1.5bn. Analysts said the results were in line with expectations, which had been revised downwards in the wake of volatility in the

money market. Earnings per share were 24 per cent higher at R13.11. The final dividend was R2.98 a share, bringing the total for the year to December 31 to R4.07, against R3.27 previously. Mr Mike Vosloo, chief executive, described the performance as "satisfactory". Margins had been squeezed by a sharp rise in short-term lending rates and the devaluation of the rand, but the group reported strong growth from international operations. Standard's subsidiaries include merchant banking and treasury operations in London and across Africa. Mark Ashursi, Cape Town

Thomson-CSF sale setback The privatisation of Thomson-CSF, the French defence electronics glant, appeared to be threatened by further significant delays last night after Lagardère, the missiles-to-magazines conglomerate, submitted a formal appeal to the Council of State.

The appeal is thought to relate to last year's failed attempt to privatise the entire Thomson group. The government initially expressed a preference for Lagardère's offer. But the process was later suspended after an independent commission rejected the terms of the Lagardère bid. This included plans to sell Thomson Multimedia, Thomson's money-draining consumer electronics arm, to Daewoo of Korea. David Owen, Paris

### Volvo seeks cuts at truck unit

Volvo, the Swedish car and truck maker, has mounted a drive to cut costs by SKr3bn-SKr4bn (\$405m-\$540m) in its lossmaking truck unit by the end of 1997. It said the rationalisation would be concentrated in its North American truck operations, which incurred heavy losses in 1996. Cutbacks and profitability-enhancing measures were also being implemented in its South American and European truck operations.

Losses at Volvo GM Heavy Truck, the US truck unit in which General Motors has a 13 per cent stake, were the prime factor behind a SKr665m loss in overall truck operations in the third quarter last year. This compares with a SKr1.1bn profit the year before. The US operation lost SKr1.4bn in the first nine months of the year after a 30 per cent fall in sales.

## Stadshypotek profits slip 2%

Stadshypotek, Sweden's largest mortgage bank, reported a 2 per cent drop in pre-tax profits to SKr3.02bn (\$408m) as lending volumes fell and interest margins narrowed. The bank is the object of a SKr22.9bn bid from Handelsbanken, which yesterday received a green light

from the Swedish competition authorities. Loans to customers dropped SKr13bn to SKr234bn, with

most of the decline coming in the retail sector. The bank's overall interest margin narrowed from 1.51 per cent in 1995 to 1.41 per cent last year. Loan losses, however, fell from Skr1.1bn to Skr575m. Stadshypotek said it had postponed a decision on a dividend until the outcome of the Handelsbanken bid was known.

## Lyonnaise des Eaux sales rise

contracts following its takeover of Northumbrian Water of the UK helped Lyonnaise des Eaux, the French utilities group, lift sales 7 per cent in comparable terms to FFr91bn (\$16.1bn) for 1996. Turnover of its services division - including water distribution and treatment and energy provision - rose 14 per cent to FFr49bn, while its construction activities remained unchanged at FFr39bn. Sales in its communications division – covering cable and television production - rose from FFr1.4bn to FFr1.6bn.

Trygg-Hansa, the Swedish insurer, yesterday moved closer to its goal of phasing out its reinsurance activities with a preliminary agreement to sell Hansa Re, its US and Canada affiliate. The insurer said it had been in talks for some time with an international group of investors to sell the operation. It said the deal would free \$60m in cash and generate a small capital gain.

### DF-1 injunction upheld

DF-1, the German digital pay-tv network owned by the KirchGroup, yesterday failed to overturn an injunction preventing it from marketing its services and advertising

## DnB looks to expand outside Nordic region to receive

By Greg McIvor in Stockholm

Den norske Bank, Norway's largest financial services group, said yesterday it was keen to expand outside the Nordic region to meet growing competitive challenges.

Mr Finn Hvistendahl, chief executive, said the growth of competition and customers' increasingly international needs required "a substan-tial strengthening of our contacts" with other financial services groups.

His comments came as DnB reported a 2.3 per cent rise in full-year profits, with higher lending and deposit volumes helping it to offset

pressure on margins. Pre-tax profits rose from NKr2.66bn to NKr2.72bn (\$410m), in spite of a dip in net interest income from NKr4.3bn to NKr4.2bn. The fall was blamed on growing competition in the banking moving into non-life insursector and to a narrower gap ance following the acquisi- NKr600m.

between lending and deposit interest rates.

Profits were some NKr150m below average market expectations but DnB shares rose NKr0.80, or 2.9 per cent, to NKr20.60 following comments by Mr Gerhard Heiberg, chairman. He said the group wanted

to play an active role in financial sector restructuring in Norway, and did not rule out participating in a deal this year. "We want to be involved... and we would like to be in the driving seat if possible," he said.

Meanwhile, Mr Hvistendahl said the group had "needs which go beyond those which can be satisfied only in a Nordic context", although it would defend its position of market leader in Norway. He said DnB was keen to develop its fund management operations and was also enthusiastic about

tion last year of Vital, Norway's second-largest insurer. DnB said cost-cutting and Norway's buoyant economy had fuelled lending and deposit growth. Operating costs fell from NKr4.9bn to NKr4.58bn. Loan losses and non-performing loans contin-ued to decline, resulting in a NKr380m net write-back of provisions against credit losses. Write-backs in 1995 were NKr479m.

DnB's net interest margin shrank from 2.51 per cent to 2.30 per cent, reflecting growing competition in the Norwegian market. Ms Abi Leach, banking analyst at Deutsche Morgan Grenfell in London, said DnB's main problem was that competition had eaten up any gains from increased volumes

The group, which is in dispute with the Norwegian tax authorities, took a NKr22m tax charge but noted it had been billed for about

## **Zambia Copper Investments Limited**

Announcement to shareholders Re: Konkola Project

In the annual report for the year ended June 30, 1996 shareholders were advised that a consortium led by 2CI (the Consortium) had entered into negotiations with the Government of Zambia and Zambia Consolidated Copper Mines Limited (ZCCM) with a view to concluding a Memorandum of Understanding (MOU) regarding the proposed development of the Konkola Project by the Consortium in a joint venture with ZCCM. It was indicated that the identified ore resource contains 340 million torms at 3.8% copper and is sufficient to continue mining operations for a period in excess of thirty years. It is estimated that the Project will access the ore resource to a depth of some 1,470 metres, mining at a rate of six million tonnes per annum and with a capacity to produce approximately 180,000 tonnes of finished copper annually. The capital cost is currently expected to be of the order of

The Consortium led by ZCI comprises ZCI (40%), Gencor Limited (Gencor) (30%) and Falconbridge Limited (Falconbridge) (30%) - Gencor and Falconbridge being

Shareholders are advised that the MOU between the Consortium, the Government of Zambia and ZCCM was signed on 11 February 1997. The MOU, to which is appended the principal terms to be incorporated in a Development Agreement and Shareholders Agreement, inter alia, provides the Consortium with the exclusive right to conduct a feasibility study on the Konkola Project, which comprises the Konkola mine (including the Konkola Deep Mining Project (KDMP)) and concentrator, together with the Mufulira smelter and refinery, and outlines the basis on which the Konkola Project would be developed should a decision be taken to proceed following completion of the feasibility study. In addition, the Consortium has confirmed that it would be prepared to assume early ownership of a majority of the shares in a company (KonkCo), into which the operations and assets that will form part of the Konkola Project will be transferred by ZCCM, prior to making a final decision on whether to proceed with the Konkola Project, although a final commitment to assume early ownership is, inter alia, subject to:

• the completion of a due diligence study on the existing operations and assets with particular reference to the period up to a final decision on the Konkola Project following completion of the feasibility study;

agreement on a timetable for transfer of ownership of a majority of the shares in KonkCo which is conwith the transfer of majority ownership to the successful bidder for Nchanga and Nkana Divisions in terms of the ZCCM privatisation process; and

agreement on the terms of a put and call mechanism entitling the Consortium to put in full its majority shareholding in KonkCo back to ZCCM at any time prior to a decision on whether to proceed with the Konkola Project and entitling ZCCM, on the occurrence or non-occurrence of specified events, to call for the re-delivery of such shares.

The Consortium's exclusive right to conduct a feasibility study on the Konkola Project will expire, inter alia, if it does not assume early ownership of a majority of the shares in KonkCo by the later of the date on which majority ownership is transferred to the successful bidder for Nchanga and Nkana Divisions and June 30, 1997.

It is presently envisaged that the due diligence study referred to above will be completed before the end of June 1997 and will be conducted in parallel with the feasibility study which it is presently anticipated will be completed by the end of 1997. ZCI's proportionate share of the costs of the due diligence and feasibility studies will be funded from its existing cash resources. The MOU provides for ZCCM to retain a 20% interest in

KonkCo (in the form of a 5% free and 15% repayable

carried interest) with the Government of Zambia being given a Golden Share with limited rights (but excluding any right to participate in profits). The MOU is not legally binding (except for the provisions dealing with exclusivity and confidentiality) and a decision on whether ZCI will participate in the Konkola Project is subject to successful completion of the due diligence study, finalisation of relevant agreements (including the Shareholder Agreement and Development Agreement) and the completion of a

Shareholders will be kept informed of further developments in regard hereto.

Operating income, excluding investment gains, was \$1bn in 1996, compared with \$882m in 1995, which excluded a charge of \$849m to cover asbestos and environmental charges.

Cigna said its priority was to increase its revenues, which fell slightly from \$18.96bn to \$18.95bn, mainly because of static income from premiums.

Its catastrophe losses increased from \$37m to \$48m

## Sheraton, Koor in Mideast venture

By Judy Dempsey

ITT Sheraton, the US hotels and casino group, and Koor. Israel's largest industrial group, yesterday formed a partnership aimed at expanding hotel capacity in Israel and the Palestinian

self-ruled territories. It is the first time a large international group has considered such a move.

Mr Bob Cotter, president of ITT Sheraton Europe. made the announcement after the group took a 51 per cent equity stake in Koor Hotels and Resorts, a subsidiary of Koor Industries. The remainder will be held by Koor Hotels. The cost was not disclosed.

In Tel Aviv, Koor's shares closed down 1.5 per cent at Shk352.16.

"This partnership sets the stage to grow throughout the region. We want to identify a Palestinian partner so that we can look towards establishing hotels in the Palestinian territories," Mr Cotter said.

Analysts said the combination of Koor's knowledge and contacts and Sheraton's worldwide marketing network would give Sheraton Israel, the name of the new partnership, a head-start on its competitors in the

Under the terms of the partnership, Sheraton Israel will manage four hotels, all located in tourist centres.

Mr Cotter said his aim was to increase the number of rooms from 1,200 to 2,500 within the next two or three years", adding that the continuation of the peace process would boost tourism in Israel and the

Mr Benjamin Gaon, president and chief executive of Koor, which has recently invested more than \$100m to develop its tourist division, said the partnership was in line with the group's aim of seeking more global

Koor's revenues during the first nine months of 1996 totalled \$2.65bn, compared with \$2.59bn over the same period the previous year. Net profits climbed 9.4 per cent to \$154.3m.

Mr Gaon has taken an interest in the development of economic and trade links with the Palestinian-ruled Gaza. He is organising a meeting between the Israeli and Palestinian business communities in an attempt to forge such contacts.

The Israel Hotels Association has said it hopes for an upturn in the tourist industry this year. Last year, violence and bombings in Israel's cities caused tourist arrivals to drop 8 per cent to 2.3m from the previous

## WMX turns down Soros board plan

WMX Technologies said yesterday that a slate of directors proposed by an investor group led by the financier Mr George Soros did not qualify for consideration at the company's annual meeting this year.

However, WMX said its board was committed to search for the best possible candidates, and its nominating committee had agreed to consider these individuals for the company's slate later this year.

On Tuesday the Soros group expressed dissatisfaction with WMX's recently announced restructuring plan and nominated a slate of four candidates be elected as WMX Reuter, Oak Brook, Illinois

### Viasa investors meet next week

Shareholders in the grounded Venezuelan airline Viasa will meet on February 20 finally to decide whether or not to seek bankruptcy for the struggling carrier, the company said. Late last week, the airline's majority shareholders - Venezuela's National Investment Fund (FTV) and Spanish airline Iberla – postponed the meeting, originally set for last Saturday, at which the carrier's fate would have been decided.

The FIV, Venezuela's government body in charge of privatisation, said it wanted to allow time for a rescue plan, launched on January 28 in Madrid, to proceed. According to the financing plan, Iberia would refinance Viasa's debt while the FTV would invest \$25m in the enterprise. But the rescue plan also involves more than 300 job cuts and has yet to be approved by workers.

The airline suspended all flights on January 23 after workers rejected a previous cost-cutting proposal by Iberia that included 440 job losses, a wage freeze and dropping unprofitable routes. If the latest proposal is approved, the FIV has said Iberia will probably retire from managing the airline. It is also looking for a new investor willing to run and recapitalise the company.

## Norfolk starts Conrail tender

Norfolk Southern, the US railway company which is pursuing a \$10.5bn hostile bid for Conrail, the smallest of the three big eastern railways, yesterday began a tender offer for all Conrail's shares at a price of \$115 a share in cash. However, the move is largely symbolic because Norfolk Southern is prevented from acquiring the shares by the tough anti-takeover laws operating in Conrail's home state of Pennsylvania, which were designed to fend off corporate raiders.

Norfolk Southern has already bought 9.9 per cent of Conrail's shares at \$115 a share, but cannot acquire more without running into anti-takeover laws. Mr Scott Flower, an analyst at PaineWebber, said: "Norfolk Southern cannot close or effect the tender, but the act of having it out there indicates their serious intent and willingness to proceed with the acquisition if some of the impediments them were removed."

Conrail has rejected Norfolk Southern's offer because it wants to accept a \$9.4bn agreed offer from CSX, the other big eastern railway. It is protected from Norfolk Southern's approach by a number of "poison pill" provisions as well as Pennsylvania's anti-takeover law.

## Time Warner closer to revamp

Time Warner has reached a "conceptual understanding" with its partner US West on a restructuring that would enable Time Warner to cut its cable holdings and shed some of its debt burden, analysts said, citing comments made at an analysts' meeting after the release of Time Warner's fourth-quarter results this week.

However, company officials said no deal with US West was imminent. Analysts said the proposal under discussion called for US West to exchange its holding in Time Warner's movie studio and HBO for several million cable subscribers.

Under this scenario, US West would assume several million dollars of Time Warner debt, they said.

## CBA climbs 11% as debt charges fall

By Nikki Tait in Sydney

Commonwealth Bank of Australia, the commercial bank fully privatised last year, yesterday announced a better-than-expected after-tax profit of A\$602m (US\$460m) in the six months to end-December, as strong lending growth offset a squeeze on interest

The result was an 11 per cent improvement on the A\$542m reported a year ago. It was helped by a 25 per cent fall in charges for bad and doubtful debts, from A\$57m in the first half of 1995-96

scored before this charge, goodwill write-offs and tax - also grew, by 6 per cent to A\$980m.

Earnings per share rose even more strongly, by 17 per cent to 66 cents, with the bank's A\$1bn share buy-back last year adding around 3.5 cents a share. The interim dividend is being raised by 7 cents, to 45 cents a share. CBA shares rose 50 cents to A\$13.91 on the news. During the half-year, lending volumes rose sharply, to A\$86.6bn, a 14 per cent increase over the

December 1995 figure. Housing loans were 14 per cent higher at A\$36.6bn, while business ket was also evident in the squeeze

lending increased by 8 per cent.

Mr David Murray, managing director, attributed the growth in year ago to 4.06 per cent. part to the group's aggressive stance on home-loan rates. CBA is Australia's largest home lender,

> sector to combat growing competition from non-bank lenders. "The bank's decision last June to lower the standard variable home loan interest rate resulted in home

tions," he said. However, the impact of increased

gins. These fell from 4.55 per cent a bank governor indicated official Overseas margins were slightly

lower at 2.16 per cent compared with 2.20 per cent, while margins and has been at the forefront of for the group overall fell from 4.12 efforts by the country's banking per cent to 3.71 per cent. Interest income stood at A\$4.06bn, after A\$3.75bn a year earlier, and interest expense at A\$2.34bn, compared with A\$2.01bn.

## UTI aims to recapture its former glory

he long-delayed appointment of Mr G. P. Gupta as chairman of Unit Trust of India comes at a critical time for the country's most impor-

tant fund manager. The 33-year old mutual fund group has been facing both an unprecedented outflow of funds from redemptions, and increasing scrutiny of its operations over

the last two years. Mr Gupta, appointed in January, was previously are allowed to invest up to 5 executive general manager with Industrial Development Bank of India, the develop-

ment finance institution. He believes his task is to expand UTI as a broad-based financial services conglomerate. The mutual has nearly 50m unitholders and funds under management of more than Rs550bn (\$15.34bn).

"We want to bring it back to its old glory," Mr Gupta The success or otherwise of his efforts will have a sig-

nificant impact on the Indian capital market. UTI is not as dominant as it was in the early 1990s, before economic liberalisation, when it was the chief alternative to banks and

direct equity holdings for private investors. Nevertheless, it still has an investment portfolio equivalent to about 11 per cent of the market capitalisation of the Bombay Stock market capitalisation takes into account the government holdings in many of the state-run companies that are

only partially-listed. To meet growing competition from domestic and foreign mutual funds, Mr Gupta's priority will be to increase fund raising. by improving customer service and branch infrastructure.

UTI will also seek custom from India's banks, which per cent of their incremental deposits in shares, but have been reluctant to do so in the past.

Mr Gupta says fund raising for money market schemes has been strong in UTT's current fiscal year to lected for equity schemes has lagged behind the target. Redemptions have eased

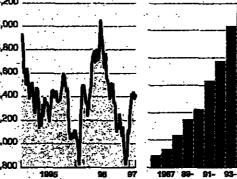

considerably in the last six months, he says, after more than two years of heavy outflows. These forced it to become a net seller on the Indian share market for much of that time. Redemptions from UTI funds rose from Rs36.31bn in

1994-95, easing to Rs108bn in 1995-96 These were both an effect and a cause of the poor performance of the Indian share

1993-94 to Rs125.42bn in

market since late 1994. The outflow and market slump combined to force UTI Exchange. Its true influence to cut its dividend in 1995-96

for the first time. While boosting fund raising, Mr Gupta appears to be toning down UTT's earlier

The group had drawn criticism concerning the transparency of its operations and allegations of conflicts plans for a wide-ranging of interest over its close links with other financial

institutions, and with the

A spur to criticism was a report to UTI's trustees. deal in 1994, by which UTI bought some Rs7.7bn of shares in Reliance Industries at Rs385 each - a level far above the then market price. Mr Gupta's predecessor.

Mr Jagdish Capoor, had planned a restructuring to improve the transparency and accountability of the

The restructuring plan would have set up a holding company. UTI would have offered shares in it to financial institutions and the Indian government.

This vehicle would then have set up an asset management company to oversee all the fund mangement

The holding company would also have held stakes in UTI's other operations, such as its retail banking, stock broking, share registry and insurance arms, and a planned credit rating

But Mr Gupta says he is precluded from carrying out such a restructuring by the UTI Act, which governs the trust's operations.

"Until the government changes the Act, we cannot proceed with restructuring," he says, adding that there appears to be little immediate sign of that.

In the meantime, Mr says. Gupta plans to set up asset

These committees would

oversee the different mutual

fund schemes. They will

operate independently and investment opportunities. This is unlikely to assuage all criticism. The links with

other financial institutions will continue, with their representatives sitting on UTT's board of trustees. Although Mr Gupta says there is no government

interference in the operations of UTI, critics assert its influence permeates the trust. Mr Gupta concedes that

his appointment was indirectly approved by the government Critics have also long

called for UTI to declare regularly a net asset value for its US-64 scheme, the largest mutual fund in India and the trust's flagship. This is seen as a test of the trust's commitment to transparency.

"We will do it. We just have not decided when," Mr Gupta says.

Mr Gupta is hoping that the February 28 budget will lead to a sustained rally on the equity market. He believes the budget should contain reforms which could boost the confidence of retail and foreign investors.

"We should see an improvement from then," he

WMC said that the downturn resulted from lower alumina and aluminium production, reflecting refinery cutbacks introduced last June and which were still in

The A\$107m bottom-line profit was scored after a A\$10.6m abnormal charge, which reflected a A\$22.4m after-tax write-down of the Nifty Copper operation, partially offset by a profit on the sale of some oil assets.

However, analysts had been warned of the likely profit fall and the result was

within the range of expecta-

tions. The shares rose 10 cents to A\$7.95. The company also signalled improved prospects on the back of more favoura-

ble metal prices and exchange rates.

"All things being equal, the current half will be markedly better than the first," Mr Hugh Morgan, managing director, said

Seven Network, the Australian commercial television network controlled by Mr Kerry Stokes which is a part-owner of the MGM film studios in Hollywood, vesterday announced an after-tax profit of A\$63m (US\$48.1m) in the half-year to end-December, down from

Higher tax bill hits

ASIA-PACIFIC NEWS DIGEST

Seven Network

\$91.9m in the same period a year ago.

The decline, however, was due to an increase in the tax charge, from A\$900,000 a year ago to A\$34.3m. Earnings before interest and tax rose slightly, from A\$97.5m to A\$101.5m. Sales revenues were 16 per cent higher at A\$118.3m.

The company said its coverage of the Atlanta Olympic Games, for which it held the Australian rights, resulted in "a small gross profit".

The company did not include any profits from MGM in the figures, as its investment in the studio – in a joint venture with Mr Kirk Kerkorian, the US businessman, and MGM's management - took place only last October.

However, it said MGM posted revenues of US\$228.7m and earnings before interest, tax, depreciation and amortisation of US\$16.7m in the period from October 10 to Nikki Tait, Sydney

### New service on Tokyo SE

The Tokyo Stock Exchange is to publish a new, volume-weighted stock price average next year, providing a fairer measure of a broker's service to clients. From autumn 1998, the daily average price of each stock will be calculated on a real-time basis by dividing the value of each trade by the volume of shares traded as each deal

The volume-weighted index will show fund managers how well their brokers are serving them when executing orders "at discretion".

In the past, the understanding was that a broker at least equalled the closing price for the stock in question when buying or selling. But this benchmark was easy to manipulate. By placing part of an order during the day and raising prices at the close of trade by completing it, a trader could seem to have bettered the market in buying

Brokers said that a fairer test was whether a trader matched the average price at which a given stock traded during the day.

Most foreign fund managers employ this yardstick, as the average can be calculated and given by a number of on-screen stock-dealing information services. The chief impact is likely to be a slight change in

trading patterns. The average should result in less volatile price movements towards the close of trading, as the incentive for traders to push up prices or drive them lower will have been removed.

## Rexam makes £37m disposals

By Michael Lindemann

Rexam, the packaging-based conglomerate, yesterday began its eagerly-awaited disposals programme, raising £37.3m (\$60.8m) from the sale of two companies.

Otis Specialty Papers, the most profitable of the 20 or so companies which Rexam said it wants to dispose of, was sold for £36m to Wausau Paper Mills, the US group. Otis reported 1996 operating profits of £4.7m on sales of

Rexam also sold PT Rexam Mulox, a lossmaking Indonesian company which makes flexible bulk containers for chemicals, to Bulkpak, a management buy-out, for £1.3m. subject to net asset adjustment. Mulox last year incurred an operating loss of £500,000 on sales of £6m and has net assets of £2.5m.

that Otis would have been easy to sell because Wausau was the "natural buyer", they welcomed the prompt sales, less than two months after Rexam launched the disposals plan. The shares edged up 2½p to 332p.

The proceeds will reduce net borrowings, which are about £223m. Rexam still has to dispose

of which are, as one analyst put it, "of the smaller and grubbier variety". These have been put into a sepa-rate eighth division, Rexam Octagon, with sales of £303m in 1995. Octagon's managers stand to receive bonuses for swift sales which exceed a target price. Mr Rolf Börjes-son, the Swedish chief executive who took over last year, hopes to complete the Octagon disposals by mid-1998.

While analysts pointed out

of about 18 companies, most

Yet this is unlikely to be the end of the story. Look further out and the Bank's medium-term inflation fore cast - rather at odds with its softly-softly noises on rate rises - is creeping up. The Bank also points out that independent forecasters are, on average, gloomier still if such figures are right, reining in consumer demand to comply with the target could well take significantly more

governor explicitly threatened to push for a half-point

than a quarter-point rate rise.

That would be fine for Labour's anti-inflation credibil ity. But it would presumably have the unfortunate side of fect of fuelling sterling's strength, further hitting exports and strengthening consumers' purchasing power.

What is the answer to this policy dilemma? Whisper it not before the election, but if Labour means what it says about macroeconomic responsibility the obvious way out is to put taxes up.

**NEWS DIGEST** 

## **C&W** reduces stake in NetCom

Cable and Wireless, the UK-based telecommunications group, yesterday sold just over half its holding in NetCom Systems of Sweden, making a profit of £40m (\$65m) on the

NetCom, created in 1993 to hold and manage the Scandinavian communications interests of Industriforvalmings Kinnevik, is the sole owner of Tele2, the chief competitor in Sweden to Telia, the national

C&W's stake in NetCom will fall from 10.1 per cent to 4.6 per cent as a result of the placing with Swedish institutions. Sale of the stock raised about £46m compared with a book valuation of £6m. Mr Stephen Pettit, C&W executive director, Europe, said: "Our shares in NetCom are held as a trade investment. This sale takes advantage of the excellent performance of the NetCom share price over the past few months and has realised for our shareholders some of the value stored in our NetCom holding." C&W acquired the stake in September last year, swapping a 39.9 per cent stake in Tele2 for a 9.5 per cent

### Thermo wins Life Sciences

Thermo Instrument Systems, the world's largest manufacturer of scientific analytical instruments. said yesterday that it had won acceptances for 64 per cent of Life Sciences International, the laboratory equipment maker, in its £235.9m (\$384.5m) recommended bid.

At the same time, Life Sciences reported a 15 per cent rise in pre-tax profits to £23.9m (£20.7m) for 1996. The outcome, was in line with expectations, came after an exceptional \$7m restructuring charge and a \$3.7m gain on

le sale of foreign exchange contracts Thermo, which is 82 per cent owned by Thermo Electron Corporation, the Massachusetts-based technology company, announced its bid on January 21. It is expected to gain full control after regulatory clearance. The shares were unchanged at 1321/2p, just below Thermo's 135p cash offer.

### Visual Action jumps to £8m

Visual Action Holdings, which supplies broadcasting equipment for such occasions as Premier League football matches and President Clinton's State of the Union Address, lifted profits by 20 per cent last year. Shares in the group, floated at 185p in March last year, rose 221/sp to

Pre-tax profits of £8.3m (\$13.5m) for the year to December 31 were struck on a 25 per cent rise in turnover

Mr Bob Ellis, chief executive, said the growth had been driven by the audio-visual division, which had more than offset a disappointing year for some parts of the film services division. He warned, however, that the strength of sterling would affect profits this year as 75 per cent are earned outside the UK. Last year strong growth on the US West Coast coupled with two acquisitions helped the audio-visual division to almost double operating profits to

£4.46m (£2.32m) on a 55 per cent rise in sales to £40.1m. S&S Holdings, a Chicago-based hirer of equipment for presentations and conferences, contributed £210,000 to profit and £3.59m to sales since its acquisition for £8.5m in September. The group said the deal marked its first expansion in the US away from the West Coast, and predicted further growth as it spread into new areas of

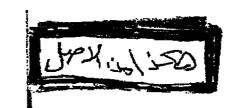

### Cadbury swallows Bim Bim

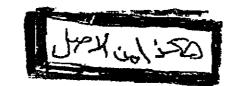

Cadbury Schweppes has bought a chocolate and sugar confectionery producer in the Middle East and North Africa as a springboard for growth in the area. An undisclosed sum was paid for Bim Bim, a family-owned company which was established in Cairo in 1961. It made a "reasonable" profit on sales of £32m (\$52m)

last year, up 7 per cent from a year earlier, Cadbury said.

Bim Bim has 26 per cent of the Egyptian confectionery market and 13 per cent in the Middle East and North Africa, while Cadbury has an additional 8 per cent of the national and 5 per cent of the regional market.

Philips is hoping to increase its European market share with a new battery, says Marcus Gibson

## Polarised argument

he battery industry's search for longer lasting products often seems to generate more controversy than genuine technological innovation. Rivals are always quick to rubbish performance claims made by developers of new battery types.

LEY COUNTY

in recent years makers of rechargeable batteries have been on the receiving end of criticism from manufacturers of conventional alkaline products. Now two big rivals in the highlycompetitive but profitable \$1.25bn European market for conventional alkaline batteries are

slugging it out. At the centre of the dispute is Philips's new PowerLife battery, launched last week in a bid to increase the Dutch company's 7 per cent share of the market -10 per cent if batteries it makes for other companies are included.

Rob Vissers, senior vice-president of Philips Lighting, says the battery gives up to twice the performance of conventional alkaline batteries when fitted in "high-drain" applications such as remote-controlled toys, and offers much improved performance with CD and cassette players. torches and shavers.

puted by Duracell, the European market leader, which obtained and tested PowerLife batteries in advance of their launch. Peter Galazka, Duracell's marketing director for Europe, says:

These claims have been dis-

"Twice the life is true only in a small number of applications. Philips won't show any advantage across the majority of mainstream, household pro-

HAVE YOU GOT ANY BATTERIES WITH MODEST

performance is due to small particles of high-grade graphite, which allows a greater volume of the active ingredient, manganese dioxide, to be packed into the bat-

The "expanded" graphite allows electrical currents to pass through the battery more efficiently, leading to less energy loss and longer life.

Figures produced by Philips suggest that most high-drain applications would continue for energy. PowerLife's improved between 30 per cent and 45 per

cent longer when fitted with PowerLife batteries. Philips says the new batteries will power a torch for 130 minutes, compared with 80 minutes using conventional alkaline units, while a toy car will operate twice as long. The company says its tests were carried out by leading independent laboratories.

TECHNOLOGY

Sales of alkaline batteries are growing at 5 per cent a year in Europe, as people and workers become increasingly mobile. Philips believes that the high-drain of-sale recovery scheme.

segment, which now makes up 43 per cent of European sales of alkaline batteries, will increase rapidly into the next century as new consumer products classed as super-high drain items, especially children's toys, laptops and cellphones, come on

In Switzerland in 1995 13 batteries were consumed per head of population compared with 11 in 1991. Some teenagers are known to spend more than £150 a year on batteries maintaining mobile hi-fi units and, increasingly, CD players throughout the

Philips executives say the PowerLife battery, which is backed by extensive Europe-wide mar-keting, is a determined effort to shake off its image of being good at innovation but poor at exploiting its products. At present Philips stands fifth behind Gillette-owned Duracell, which has 36 per cent of the alkaline market in Europe.

PowerLife batteries will be available in March, but Philips gave no hints on prices. "It won't be twice the price of conventional batteries," the company says, "but a premium price will be justified. It will be cheaper per milli-watt than its rivals."

The PowerLife battery is also said to be the first which does not contain heavy metals such as lead, cadmium and mercury. As a result, used batteries will be recycled as feed in steel-making. But Philips says it has no plans to take back spent batteries from consumers as part of any point-

### **Worth Watching · Vanessa Houlder**

### New ways of telling left hand from right

Scientists at the Tokyo Institute of Technology have developed a new approach to synthesising pure forms of "chiral" molecules, a procedure that plays an important role in the pharmaceuticals industry.

Chiral molecules come in two forms, which are mirror images of each other. The difference between the right-handed and left-handed forms can have a huge impact on their behaviour. For example, the unforeseen effects of the thalidomide drug were caused by the presence of molecules with the wrong 'handedness'. As a result, chemists have to be able to synthesise reliably the correct form – or 'enantiomer'

of a particular molecule. The Tokyo scientists believe their approach to selective synthesis is more efficient than conventional techniques. They selectively activated one enantiomer of a titanium catalyst, which was then able to cause bias in the reaction to

### Aigorithms and algae

Data from earth observation satellites are being put to use in monitoring toxic algae 'blooms' around the British

Although algae blooms are usually harmless, some strains seriously damage sea life. The monitoring system uses a number of algorithms to determine the extent of potentially harmful algal blooms. The Environment Agency will be able to combine the information with that from airborne coastal studies to warn about affected areas and produce forecasts of algal growth and movements.

The Algal Bloom Monitoring System has been developed by Anite Systems in conjunction with Dundee and Bangor Universities and the British

National Space Centre. Anite Systems: UK, (0)117 9277854; fax (0)117 9290917.

### Up to speed on golf technology

A novel way of regulating the speed of electric golf trolleys will make them easier to handle and extend their range, writes Michael Sibley. A sensor in the handle matches the spee of the trolley to that of the golfer by continuously adjusting the voltage delivered to the motor.

The trolley, which has been developed by a company in Alderley Edge, Cheshire, starts when the handle is gripped and stops when it is released. It will automatically brake on steep downward slopes.

trolleys have to be continually adjusted to cope with stops and starts, the varying terrain and other speed changes dictated by the nature of the golf course. JH & Co: UK, tel (0)1625 586636; fax (0)1625 586636.

## A prompt reminder for patients

Pagers are being used to overcome memory loss, says Hilary Bower

Gentle alert: a commercial bisecer

Thermo was it. Nam

esearchers working with head injury patients have Adeveloped a unique use for one of today's most ubiquitous communication gadgets - the pager - which not only helps overcome the often devastating problems associated with memory loss, but could dramatically reduce associated healthcare costs.

The system, developed in California by the engineer father of a head-injured son and called Neuropage, looks like any standard pager worn on the belt. but its instructions emanate from a specially primed computer at the Oliver Zangwill Centre for Neuropsychological Rehabilitation. This facility opened recently at the Princess of Wales Hospital in Ely,

Cambridgeshire. Using an arrangement of microcomputers linked into the main computer's modem, reminders to meet the needs of individual patients are transmitted to a paging company's computer system at specified times and dates. Once

the prompts have been programmed, no further interfacing is necessary: the patient simply receives the characteristic beeper alert on their pager and the message on Trials carried out by the centre

and the Medical Research Council Applied Psychology Unit found on average patients' ability to remember and carry out tasks such as taking medication. attending appointments, checking things for school or

work, and domestic chores - rose from 37 per cent to 85 per cent. and the most successful patients moved from not remembering anything to remembering 99 per cent of their tasks.

After three months, some patients found their routines sufficiently established to dispense with their pager. Others, however, returned dramatically to pre-pager levels of remembering once it was removed and would benefit from long-term access.

Barbara Wilson, the centre's director and a clinical neuropsychologist, says brain injury often leaves patients with mental faculties intact but with a faulty memory. This can cause widespread disruptions to their own and their family's lives.

way to calculate the cost-benefit of providing pagers on the national health and to assess their value to a wider group.

## **SPOT THE REFUGEE**

There he is. Fourth row, second from the left. The one with the moustache. Obvious really.

Maybe not. The unsavoury-looking character you're looking at is more likely to be your average neighbourhood slob with a grubby vest and a weekend's stubble on his chin.

And the real refugee could just as easily be the clean-cut fellow on his left. You see, refugees are just like you

and me. Except for one thing.

Everything they once had has been left behind. Home, family, possessions, all gone. They have nothing.

And nothing is all they'll ever have unless we all extend a helping hand. We know you can't give them back the things that others have taken away.

We're not even asking for money (though every cent certainly helps). But we are asking that you keep an open mind. And a smile of welcome. It may not seem much. But to a refugee it can mean everything.

UNHCR is a strictly humanitarian organization funded only by voluntary contributions. Currently it is responsible for more than 19 million refugees around the world.

### INTERNATIONAL CAPITAL MARKETS

## Strong demand for **Fannie Mae global**

INTERNATIONAL BONDS

By Edward Luce

Fannie Mae's sterling global bond issue again captured the limelight in the eurobond market yesterday, with strong demand from mostly UK investors.

The £1bn bond issue was the markets, drawing heavy demand from European investors. The bonds' 10-basis-point yield spread tightened to 8 basis points over five-year gilts in afternoon

"It is trading at a premium already," said a spokesman at BZW, joint lead underwriter with Merrill Lynch. "The issue is very strongly anchored in the UK market, with UK investors taking the largest share of the offer."

Some 47 per cent of the issue was placed in the UK, 20 per cent in Asia, 18 per cent in continental Europe and 15 per cent in the US. Traders expressed surprise at the strength of demand

considering the large size of attention with its US\$1bn the issue - BZW said it issue lead-managed by received £1.65bn in highquality bids.

very innovative," said one trader. "Fannie Mae has again broken ground after closure of the seven-year its D-Mark and yen issues." maturity in the US.

Fannie Mae executives in the US said the agency was judged a strong success by also looking for the right moment for a FFr3bn-5bn issue during the year to be lead-managed by Merrill Lynch and Société Générale. "There's been quite a bit of supply in the French mar-

> tunity," said Mr Mehmood Nathani, director of long-term funding at Fannie Mae in Washington. Mr Nathani added that the agency was looking to raise 10 to 20 per cent of its funding requirements from its "global window" this year after raising about 10 per cent overseas in 1996.

Subordinated debt was in Locale de France attracting trend."

Nomura. Traders described the bond, priced at 18 basis "The sterling global was points over "off-the-run" seven-year US Treasurles, as "a bold move" in light of the

issue which was priced quite official in London. "It will be year market in dollars." Nomura said 42 per cent of the issue was distributed in ket recently, so we are the UK alone and 28 per cent waiting for the right oppor- in Asia and Japan.

BGB Finance, the Berlinbased bank, also issued subordinated debt in a \$250m bond, priced at 70 basis points over 10-year US Treasuries, was lead-managed by Salomon Brothers. "We've seen more and

more subordinated debt coming into the euromarket," said one trader. "The BGB subordinated dollar issue vogue yesterday, with Crédit issue will help develop this

## Jumbo loan for France Telecom

By Conner Middelmann

Many large deals are nearing completion in the syndicated loans market, and more are in the pipeline.

A \$1.2bn jumbo seven-year revolving credit facility for France Telecom has attracted strong international support, while attempts to lure domestic lenders into the deal met with little success.

In spite of its relatively tight pricing, the facility was substantially oversubscribed by the deadline last Wednesday, raising an estimated \$1.65bn and fuelling talk that the deal will be increased by a further \$200m.

Meanwhile, three large project financings in the Italan power sector are keeping hankers busy.

The first, a L1,000bn 15year project financing for API Energia, was heavily oversubscribed, raising around L2,000bn in general syndication, bankers said.

This augurs well for two similar transactions currently in the market: a L1,940bn 15-year project financing facility for Sarlux Sri to fund the construction of a 550MW tar gasification plant in Sardinia, and a L1,885bn 13-year project financing for Isab Energy to finance the construction of a 512MW tar gasification plant in Sicily. One transaction that has

attracted some attention is and Royal Dutch/Shell. The new \$2bn facility is

year with a margin of 35 Greek observers say.

basis points over Libor, which in turn refinanced a \$2.5bn facility established in 1995 at 85 basis points over Libor.

The latest deal is structured in several tranches, and at least part of it is expected to pay a margin of 20 basis points over Libor.

in the UK, banks are josthing to win the mandate for a jumbo £2.9bn two-year transaction for Cable and Wireless in connection with the merger of its subsidiary Mercury Communications with Bell Cablemedia, Nynex CableComms and Videotron.

Between 10 and 12 banks are thought to have been asked to submit bids for what is expected to be an aggressively priced deal. 'Although, traditionally,

cable companies have come at quite rich terms, this deal is expected to be priced at or close to corporate levels," said one banker, explaining: "It is a short-term facility in Bankers are also casting

hopeful glances in the direction of Greece, which is thought to be planning a refinancing of two five-year facilities worth \$1.1bn at a much lower margin than the current 80 basis points.

sury appears not to have made a decision as to when and whether it wishes to proceed with the refinancing. Strong foreign inflows of the amendment of a facility funds in recent weeks. for Montell Polyolefins, a attracted by improving ecoplastics joint venture nomic fundamentals and the between Montedison of Italy relatively high yields available on Greek government securities, mean the authoripartially to refinance a ties are not in a hurry to tap against DM1.6785 and \$2.3bm deal put in place last the international market,

## Resistance hampers sterling's rise

MARKETS REPORT

By Richard Adams

Sterling's upward march and the D-Mark's retreat were slowed yesterday, after central bank statements in the UK and Germany calmed the foreign exchange markets.

intra-day highs against the D-Mark, after the Bank of England's latest quarterly inflation report was inter-preted as taking a milder the resistance level of acceleration of demand and tone on the prospects for UK inflation. The pound gained a third of a pfennig against the D-Mark, to close at DM2.7716. DM2.7495.

The D-Mark also recovered against the US dollar during the day, after the Bundesbank insisted it backed the statement by the Group of Seven (G7) economies that the dollar's value had been corrected.

The dollar ended at DM1.6832, up 1.11 pfennigs, having reached a high of

Western Europe

Natural gas consumption in western Europe jumped 10

per cent in 1996, the fastest growth rate in recent years,

Eurogas said yesterday. The main reasons for the higher

demand were cold weather, an increase in customers in

private households and a strong rise in gas consumption

Industry, said Denmark and Spain, the front-runners in

1995, also had fast growing consumption last year, with

growth of 18 and 15 per cent respectively. "They were joined this year by the United Kingdom, which registered

a 16 per cent increase in gas demand due to an increase in

gas-fired power generation and low gas prices," Eurogas

Gas consumption rose 12 per cent in Germany and 11

registered increases of 7 per cent to 10 per cent. Only Italy

and Ireland experienced moderate gas demand increases,

Indigenous production accounted for more than 70 per

cent of total supplies. Some 19 per cent was imported from

Russia. 10 per cent from Algeria and less than 1 per cent

from other sources, such as north Africa and the Middle

per cent in Belgium. "Other west European countries

of 2 per cent," it added.

### MARKETS REPORT

By Peter John

Gold fell sharply yesterday, hitting a near four-year low on concerns about selling by central banks.

Shortly before midday in London, the price dropped below \$337 for the first time since April 1993. It rallied later but was still off \$1.80 at \$337.70 by the afternoon fix.

Dealers said the falls had been backed by heavy volume, which suggested central bank involvement. In January, the Dutch central bank said it had sold 300 tonnes, its fourth disposal since 1989.

Mr Andy Smith, precious metals analyst at UBS, said the heavy slide since January might reflect the final unwinding of positions taken after heavy investment by Mr George Soros, the international investor.

In 1993, Sir James Goldsmith sold a stake in Denverbased Newmont Mining to Mr Soros and then bought call outions with some of the proceeds. Early that year. gold was at \$327 an ounce.

"It is now getting back to pre-Soros levels," Mr Smith said. "It's taken three years for the exit strategy to be implemented." He added that in the short-term there was room for a blip upwards. but that the medium to long-term sentiment was still negative.

Oil was volatile as dealers reacted nervously to US and

Opec production figures. Brent crude fell back in the API announced weekly US inventories showing stocks are rebuilding rapidly and figures from the International Energy Agency showary was up by 1m barrels a the price up \$38 to \$2,250.

## \$ per fine ounce in London

day compared with last year. Brent turned around a 50 cent fall in the afternoon, and by 6pm April stocks

were virtually flat at \$21.12. Attempts to call coffee lower in London were scut-tled as the New York contract hit new highs on the back of the general strike in Colombia. The London contract for May traded as much as \$40 lower on Liffe in early trading, but tightness continued in New York with activity from funds and roasters, the fundamental buyers, forcing up prices.

In the afternoon, speculation that a third of road transport in Colombia was crippled by strikes sent New York prices even higher. Although the arbitrage with the London contract widened to 92 cents, London was dragged up to end the day \$24 higher at \$1,667. Copper traded higher on

the London Metal Exchange although many market participants were at an industry early London dealing after meeting in New York. Speakers at the American Metal Market Forum on Tuesday argued that the market would be in surplus by the end of the year. Nevertheless, short covering pushed

## Gold hit by Zambia in copper accord

By Mark Ashurst in Cape Town

The Zambian government vesterday reached a landmark in the privatisation of Zambian Consolidated Copper Mines when it granted exclusive rights to its Konkola Deep copper deposit to a consortium of three international mining groups.

The agreement follows negotiations spanning more than two years since rights to the deposit were first offered to Anglo American, the big South African min-

The deal has been struck only a fortnight before the February 28 deadline for bids from rival mining groups for other ZCCM assets, and

## Petroz files claim over Timor

Petroz, the Perth-based oil and gas company, has filed a compensation claim against Australia's federal government over the loss of its interests in an exploration permit in the Timor Sea. The area was redefined after Australia and Indonesia hammered out a innovative "zone of co-operation" to cover the highly-prospective -offshore area in 1989, and existing permit holders claimed to have lost out.

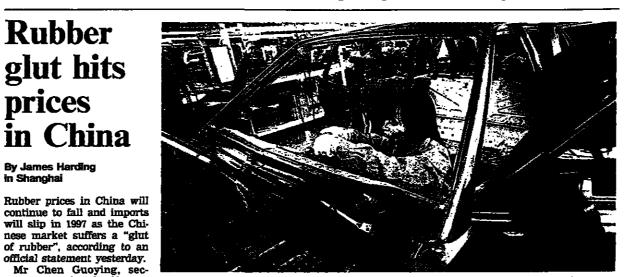

WMC, the larger Melbourne-based mining company which also held an interest in the permit area, has already taken legal action against the Australian government, and won in the Federal Court. However, the natter is expected to go to the High Court, the highest judicial authority, in mid-1997, with a roling expected some time after that. Nikki Tait. Sudney

### Santa Fe lifts Kazakh stake

Santa Fe Pacific Gold, one of the biggest gold producers in North America, yesterday said that it had increased its interest in Kazakhstan's Sharaltyn exploration project to 100 per cent from 50 per cent at a price of \$3.05m. The project covers a 7.5m acre licence area in north

astern Kazakhstan. The 50 per cent carried interest in the project is currently held by two state-owned entities. The company's move into central Asia – announced in June 1995 – was seen as part of an aggressive international search by a company that had only three mines, all in the US.

The latest Kazakhstan transaction will become final within three to four weeks after registration with the country's Ministry of Justice, Santa Fe said. Reuter, Albuquerque

A stagnant Chinese car market resulted in tyre stockpiles growing 20 per cent in 1996

Chinese demand is forecast to rise 5 per cent in 1997 to 1.47m tonnes, of which 1.05m tonnes will be met by domestic production. Government officials

believe the oversupply and recent global forecasts that a price collapse in the Chinese recovery in the rubber mar- rubber market last year ket is unlikely this year as were driven by a marked production continues to out- rise in imports, which increased 45.1 per cent on Rubber supply jumped 22.6 1995 to 917,000 tonnes. per cent last year to 1.89m accounting for approximately half of China's annual consumption. ## Food retailers bought

By Joel Kibazo and Jeffrey Brown

The buils of the food retailers took hold of leading issues in the sector which helped produce a bounce in stocks that were already on the slide.

Concerted selling of Safeway in the early part of the ssion drove shares in the UK's third biggest food retailer to a day's low of

However, those feeling more positive about the sector and Safeway as a stock later entered the fray. This not only halted the slide, but soon had the stock moving per cent stake in the UK

By the close, shares in Safeway displayed a net gain of 10 at 3561/2p, one of the best performing FTSE 100 stocks of the day. Volume had reached 16m by the

lier decline to end 2% ahead at 114%p. Turnover was 24m. Both stocks are favoured

by Dresdner Kleinwort Benson which has just issued a detailed note on food infla-

said: "In the last four weeks, more than 5 per cent, British food inflation has fallen Aerospace and GEC all feasharply. This is likely to persist until the autumn, after the Footsie rankings and which we expect a modest there were plenty of secondrecovery. However the liners looking equally

response to earnings reduc- down tions of 3 per cent has been a 10-15 per cent sectoral devaluation, which looks to be an

Tesco was also on the wanted list and the shares hardened 61/2 to 338p.

International news and bounced from Tuesday's retreat to make it the best performing stock of the day in the FTSE 100 index.

cautious outlook for trading traded and BAe came off 35% as the company published annual results on Tuesday, recovered yesterday to end the day 241/4 up at 6501/4p. with 14m dealt.

Media group Pearson, owner of the Financial Times, appreciated 15 to 763½p as the market digested reports that US fund manager Mr Michael Price has acquired a near 1 group. Mr Price is known as a shareholder who pushes management into restructuring moves.

Group rose 35 to 11611/2p, as analysts reflected on comments by Dutch group Poly-Asda Group was another Gram suggesting it expects stock that reversed its ear- conditions in the world music industry to improve. Some of the upside pres sure on sterling eased yesterday, but currency scares

continued to dog the big

Engineers were notably FISE ARM Analysts at the broker friendless. Rolls-Royce, off o tured at the bottom end of

FKI, the subject of a recent "reduce" note from NatWest Securities, came off 111/2 to 180p and T&N, with a 30 per cent sales exposure to 11% better at 341p. the D-mark bloc, retreated 7

to 149½p. Mr Zafar Khan at SGST information group Reuters said earnings downgrades across the sector this year ranged from 2 to 5 per cent and the trend clearly had further to run. Rolls ended The shares, which fell on a 12% lower at 220p in 16m to 1190p. Electronics glant GEC fell 9 to 3831/p.

Siebe slid 25 to 9641/2p partly on the news of a 155p a share (£46m) agreed cash hid for Whessoe, the controls group which put out a profits warning last May. Whessoe jumped 65½ to 155½p.

Bid rumours resurfaced at Chubb Security. A combination of strong brands and perceived suspect manage-

in the mouth, ment periodically sparks lagged behind other leading building-related shares, and the broker is looking for good numbers when the company unveils interim

results next month. Support services group BTG jumped 45 to 516%p to top the FTSE 250 rankings after its drugs side received FDA approval for Benefix, a blood clotting treatment.

Chemicals group ICI was boosted by a recommendation from SBC Warburg which upgraded the stock Profit-taking in Anglofrom "add" to "buy". The Dutch consumer products shares put on 61/2 to 7581/2p. However a further

shares ease off its record advance was curtailed by Salomon Brothers which downgraded its recommendation from "buy" to "hold" and also reduced its profit expectations for both the recommendation from Mercurrent and following year.

BP rallied. Down 421/2 in two days, the shares recovered 61/2 to 7001/20 in 20m traded helped by buy recommendations from NatWest Sachs and vague rumours that a special dividend could be in train.

The former saw this week's weakness for the stock as a buying opportunity while Goldman based reiterated buy advice on a forecast for 1997 earnings of \$9.30 per ADR, up from \$8.85 last year.

Shell put on 81/2 to 1061p ahead of today's fourth quarter results statement.

Telecoms shares pushed ahead on a broad front supported by a positive 60-page sector review from NatWest Securities and an earnings upgrade for Cable and Wireless from Merrill Lynch. The NatWest research

stresses the rapid movement in ownership and technology within the sector over the past 12 months and looks for continued change in the coming year. It is notably keen on BT and Orange, but urges clients to take profits on Vodafone.

Merrill's contribution the improved sector sent ment was an earning upgrade to £1.3bn for C&V and an increase to 600p fo its target price on the stock C&W gained 12% to 508%p. BT put on 3 to 441%p furnover of 20m, and Orang

added 4 to 214%p. Vodafor

came off 6 to 279½p Some brewery stocks had another strong day with Scottish and Newcastle adding 9% to 691p and Whitbread up 16 at 816%p. There was an analysts' visit to Whitbread's David Lloyd and restaurant operations on Tuesday, but little price-sen-sitive information was said to have emerged.

fish ponds being built in the Irian Jaya rainforest in eastern Indonesia. 🔷 The fish ponds provide a much needed, reliable source of income and food for the local community. They also produce an invaluable by-product; a reason for the villagers to take of care the local rain forest The ponds require a supply of clean,

fresh water. This is only available throughout the year if water-retaining roots of the neighbouring trees are kept intact. Which gave WWF good reason to provide plans and concrete for the ponds, and fish to stock them with. example than by just giving advice. WWF agricultural extension workers helped to construct concrete tanks and dig fish ponds. Now an entire community benefits, and the entire community runs the fish pond

IN INDONESIA WE PROTECT

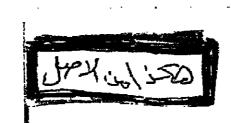

THE RAINFOREST WITH FISH.

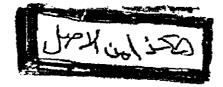

WWF project has resulted in over a hundred

bership Officer at the address below.

World Wide Fund For Nature (formerly World Wildlife Fund) onal Secretariat, 1196 Gland, Switzerland.

were in free-fall yesterday, tumbling 11.5 per cent and taking their two-day losses to 20 per cent after the central bank announced tighter controls on

foreign investment.

The bank said on Tuesday that foreign investors needed special trading accounts with fully licensed banks if they wanted to invest in domestic companies. Analysts said the long-term impact of the move remained unclear and that this had triggered the rash of

However, traders pointed out that turnover tumbled yesterday to just T74.3m from T545.7m on Tuesday. For-eign demand had been credited with the Slovenian bourse's spectacular bull run this year, which drove the SBI index to an all-time high on Monday — up 40 per cent since January 1. The index ended 179.46 lower yesterday at 1,380.66.

FT/S&P ACTUARIES WORLD INDICES

back to life this week after a fort-night's slumber. The blue chip RTS-24 index rose 3.8 per cent on Monday and 2.5 per cent on Tuesday, extending its rise since the start of the year to more than 50 per cent. The index peaked yesterday at a record 312.66 before pulling back to close 5.81 lower at 306.79. Analysts attributed the breathtaking ascent since the start of the year to strong demand in a tight mar-ket from domestic and foreign investors. The domestic buyers included commercial banks switching from the treasury bill market where many yields, adjusted for inflation, had fallen to under 30 per cent from 200 per cent early last year. Further stimulus had come from the IMF's decision to release \$650m in delayed funds to Russia last Friday and from Moscow's inclusion in the International Finance

Corporation's index this week.

## High tech rebound Zurich hits tenth consecutive high
